

Is biscuitsandbullets.com a scam? TrustSniffer's high-risk assessment: 0/100

biscuitsandbullets.com

Verdict

0
OUT OF 100

CRITICAL RISK

biscuitsandbullets.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be	A minimal coming-soon landing page for biscuitsandbullets.com with an email sign-up and contact form. Protected by reCAPTCHA and presenting cookie consent; no e-commerce, financial solicitations, or credential-harvesting elements detected.
------------------------------	---

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://biscuitsandbullets.com/>

What biscuitsandbullets.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a minimal coming-soon landing page for biscuitsandbullets.com, presenting an “Launching Soon” notice, an email sign-up list for updates and promotions, a general contact form, cookie consent, reCAPTCHA protection, and promotional references to the Airo AI Builder platform; its apparent model is lead capture rather than an active commercial or financial service.

Scam/Impersonation Risk

The site’s visible page is presently limited and does not contain a login form, payment flow, financial solicitation, credential-harvesting mechanism, or detected brand impersonation. However, this benign page-level presentation is outweighed by confirmed external malicious detections and a confirmed blacklist status across multiple reputation sources. The external abuse reports concern a shared Amazon-hosted IP rather than being uniquely attributable to the website, but that attribution does not remove the separate domain-level detection concern. The combination warrants treating the domain as unsuitable for sensitive interaction, including credential submission, account use, or financial activity.

EVIDENCE

- Homepage: minimal “Launching Soon” landing page with an email sign-up and contact form; no login or sensitive form was detected.
- External reputation assessment: 11 malicious and 1 suspicious detections were recorded, with two tier-one security vendors flagging the domain.
- External reputation assessment: the domain is confirmed blacklisted; the associated IP has 13 abuse reports attributed to shared infrastructure.
- Registration and archive records: registered 2025-09-02 and approximately 0.96 years old; 87 archive snapshots spanning 2011–2024 across 14 tracked years.

Regulatory Verification Notes

The available identity verification is inconclusive. The site does not present a claimed license, licensing authority, or registration number, and its current disclosure of the operating entity is unclear; this is a material verification gap for any organization expected to conduct regulated or higher-risk activity. Registration is administered through GoDaddy.com, LLC, while the listed registrant organization is Domains By Proxy, LLC. A separate broker-reputation dataset returned no name match, which is contextual only and does not establish licensing, authorization, or legal standing.

EVIDENCE

- Homepage: displays the domain name, “Launching Soon” messaging, and site-builder promotional text without an identified operating company or regulatory disclosure.
- Registration record: registrar is GoDaddy.com, LLC; creation date is 2025-09-02 and expiration date is 2030-09-02.
- Hosting telemetry: served from AS16509, Amazon.com, Inc., US.
- Transport security: TLS certificate issued by GoDaddy TLS Intermediate CA DV - R1v1, validation level DV, valid to 2026-09-28.

What to Verify Next

No sensitive interaction should occur unless the operator can first be independently connected to a real-world entity and the external reputation findings are resolved. The relevant authority should confirm any license or registration required for the operator’s intended business activity. Contact details should be validated through an independently sourced route rather than relying solely on the site’s form, and any future request for credentials, identity documents, payment information, or account installation should be treated as requiring separate security review.

EVIDENCE

- Homepage and contact interface: the site currently relies on an email sign-up and general contact form, providing no independently validated business channel.
- Legal and identity disclosure: no license number, licensing authority, or clearly identified operating entity is presented in the supplied page content.
- External reputation findings: malicious detections and blacklist status require independent resolution before the domain is used for sensitive activity.

Summary Verdict

The overall posture is critical, with sensitive-interaction risk and an independently unverified operator identity. The available evidence does not support treating the website as a trustworthy destination for account, credential, or financial activity.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure and resolves through Amazon.com, Inc. edge servers in AS16509; all observed addresses were edge addresses, with no origin candidate identified. This reduces direct exposure of the origin environment, but it is only a mitigating infrastructure characteristic and does not establish legitimacy or offset the external threat findings.

Closing Assessment

The appropriate institutional posture is to suspend sensitive interaction and require independent operator, regulatory, and reputation validation before any further engagement.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 13 reports on hosting IP 76.223.105.230 (Amazon.com, Inc., Content Delivery Network), 26% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of biscuitsandbullets.com.

- The request stayed on biscuitsandbullets.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by domaincontrol.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2030-09-02. [CLEAR](#)
- The earliest public archive of this site is from 2011-02-07. [CLEAR](#)
- It is hosted on AMAZON-02, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about biscuitsandbullets.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
