

Is bisp.gov.pk legit? TrustSniffer's high-trust assessment: 90/100

bisp.gov.pk

Verdict

90

OUT OF 100

HIGH TRUST

bisp.gov.pk appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 75%.

What this site appears to be

Official Benazir Income Support Programme website content: helpline and contact info, programme overview, laws and policies, procurement notices and evaluation reports, downloads, news and multimedia, beneficiary portals and registration instructions.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the Benazir Income Support Programme website, a government public-service portal presenting social-welfare programme information, beneficiary guidance, registration resources, procurement notices, reports, policies, news, and official contact channels.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent institutional identity as the Benazir Income Support Programme and Government of Pakistan, with content centred on public administration rather than commercial monetisation. Its homepage and programme materials contain no observed phishing, credential-harvesting, crypto, gambling, or brand-impersonation indicators; the available reputation checks were also clean. The published helpline address, "info@bisp.gov.pk", contains a contact-channel integrity anomaly because the address uses a government-domain format that may require confirmation of its deliverability and official status; this is an isolated anomaly, not evidence of impersonation or a confirmed scam. Available evidence is therefore consistent with an established, apparently legitimate public-service website, while the real-world operator identity is not independently verified.

EVIDENCE

- The homepage identifies the Benazir Income Support Programme and Government of Pakistan and presents programme information, beneficiary guidance, policies, procurement, and reports.
- The homepage's form and behaviour review found no login form, hidden form, external password submission, wallet interaction, or cloaking.
- The domain was registered on 2008-11-02 and is approximately 17.8 years old; archival coverage records 477 snapshots from 2009-06-29 through 2026-08-13 across 18 years.
- External reputation checks recorded zero malicious detections, zero suspicious detections, no malicious safe-browsing result, and no external blacklist hit.

Regulatory Verification Notes

The website's legal and governance material is substantial for a public agency: the About and legal sections identify the programme, reference the BISP Act 2010, and publish policies, regulations, committee information, procurement notices, and evaluation reports. No independently verified regulatory or licensing determination is available from the supplied evidence, and the site is not presented as a third-party regulated financial service; the appropriate interpretation is an institutional disclosure and verification note rather than a scam indicator. The available evidence supports an apparently established government portal, but it does not independently prove the real-world operator identity.

EVIDENCE

- The About and legal pages publish the BISP Act 2010, conflict-of-interest and whistle-blowing policies, employee service regulations, conduct regulations, and financial regulations.
- The procurement and reports sections contain banking-partnership notices, procurement cancellations, evaluation reports, and IT-infrastructure procurement material.
- The site is served from AS13335, CLOUDFLARENET – Cloudflare, Inc., US; its TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-10-25.
- The homepage identifies the service as a government/public-service portal and links to beneficiary registration, downloads, tenders, contact information, and official social channels.

What to Verify Next

Before credential or payment interactions, independently confirm that the relevant beneficiary or registration portal is reached through the institution's official contact channels rather than through an unsolicited message. Confirm the programme's current contact details and any applicable service requirements through the published helpline or an independently obtained government source. For any transaction or data submission, review the applicable privacy, service, and dispute information and ensure that the requested action is consistent with the stated public-service purpose.

EVIDENCE

- The homepage publishes helpline 0800-26477, Help Desk/FAQ, Contact Us, and beneficiary registration guidance.
- The site links to a separate beneficiary result portal and to social accounts associated with the programme.
- The legal section provides the policies and regulations against which service procedures can be compared.

Summary Verdict

The overall posture is **high trust and low risk**, with strong convergence across the site's institutional content, sustained domain history, clean external reputation, and normal technical operation. The website appears legitimate and established, but the available evidence supports that conclusion as an apparent or evidence-consistent assessment rather than independently verified proof of the operator's real-world identity.

Infrastructure Integrity

Cloudflare CDN and WAF protection provide a mitigating layer against direct exposure of the service infrastructure. The observed addresses were CDN edge infrastructure, and no origin candidate was identified; this supports a conventional protective deployment but is not, by itself, proof of legitimacy.

EVIDENCE

- Four observed edge addresses were associated with AS13335; no likely origin IP was identified.
- The hosting provider was CLOUDFLARENET – Cloudflare, Inc., US, with the infrastructure registered through ARIN.
- TLS used issuer WE1 with DV validation and an expiry of 2026-10-25.

Closing Assessment

Normal informational use is proportionate to the available evidence; credential or payment interactions should follow ordinary independent checks of the official service channel, the requested action, and applicable user protections.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Identity verified on page
- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bisp.gov.pk.

- The request stayed on bisp.gov.pk. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-02. NOTED
- The earliest public archive of this site is from 2009-06-29. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bisp.gov.pk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
