Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Bitcoin blockchain explorer that presents block, transaction, address, mempool, and network-status information while connecting visitors to a broader cryptocurrency-services ecosystem. Its apparent business model combines free blockchain-data utilities with referrals or access to related commercial services.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, deceptive return claims, or other fraud signals were observed. The homepage links the informational explorer to wallet, Bitcoin purchasing and exchange, rewards, crypto-backed lending, and explorers for 26 named digital assets; these commercial functions carry ordinary cryptocurrency counterparty and transaction risk, but their presence does not undermine the site's legitimacy. Confidence is reinforced by a long-established domain, continuous historical presence, a strong global traffic footprint, and clean external threat reputation.

- Domain registration records show registration through MarkMonitor Inc. on 23 August 2018, making the domain approximately 7.94 years old; registration extends to 23 August 2028.
- Historical records contain 75 archive snapshots spanning 29 June 2019 to 18 July 2026, covering 8 tracked years without evidence of suspicious repurposing or semantic drift.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, no abuse reports, and no signature matches for the assessed domain.
- Traffic telemetry places the domain at rank 46,166 and within the global top one million websites.

Regulatory Verification Notes

The available page evidence does not establish a regulated-services claim or identify a licensing authority or licence number. This is a limited disclosure consideration rather than evidence of misconduct: the assessed page primarily operates as an informational blockchain utility, while separately linked exchange, purchasing, rewards, and lending services may be provided under their own terms and legal arrangements. No conflicting legal-entity names were identified, and the available broker-reputation context produced no matched broker record.

- The homepage describes blockchain lookup and network-monitoring functionality but presents no explicit licensing claim or named regulatory authority.
- Registration records identify MarkMonitor Inc. as the domain registrar, a well-established corporate domain-management provider.

- The site's transport encryption uses a WE1-issued domain-validated certificate, valid until 1 September 2026.
- Hosting telemetry shows service from AS13335, operated by CLOUDFLARENET – Cloudflare, Inc., US.

What to Verify Next

Before entering into a financial arrangement through any linked third-party service, the applicable operator, contractual terms, fees, jurisdiction, and regulatory status should be confirmed on that service's own legal pages and, where relevant, against the competent official registry. Transaction identifiers and destination addresses should be independently checked before relying on explorer results for settlement decisions, and official contact channels should be confirmed through an independent route when support is required.

- The assessed homepage contained no login form, password field, sensitive form, or form submission to an untrusted destination.
- Controlled browser interactions detected no wallet provider, wallet-drainer behavior, clipboard modification, cloaking, hidden forms, suspicious inline scripts, or non-whitelisted external submissions.

Summary Verdict

This is a legitimate, established, and trustworthy website with consistent identity, historical, reputational, behavioral, and technical signals. No contradictory evidence was observed, and normal interaction—including account login and standard use where such functionality is offered—is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare's CDN and WAF, with all six observed addresses operating as edge infrastructure rather than exposed origin hosts. This reduces direct origin exposure and provides mainstream traffic-filtering protections, although infrastructure protection is a mitigating control rather than independent proof of legitimacy.

Closing Assessment

Prospective users may use the website normally, applying standard transaction-level diligence when moving from informational functions to third-party financial services.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bitcoinblockexplorers.com.

- The request stayed on bitcoinblockexplorers.com. It was not redirected to another domain. CLEAR
- Registration is published under MarkMonitor Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-08-23. CLEAR
- The earliest public archive of this site is from 2019-06-29. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bitcoinblockexplorers.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
