- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Bitcoin Magazine is an established Bitcoin news and media platform presenting journalism, market analysis, technical guides, educational content, videos, books, print magazines, events, advertising, and newsletter subscriptions. Its apparent business model is media-led, supported by advertising, sponsored content, subscriptions, merchandise, conferences, and related partnerships rather than investment solicitation.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent editorial identity across news, business, culture, markets, politics, technology, guides, magazines, books, and events, while the published model does not solicit deposits or promise financial returns. The site exposes no login, password, wallet-connection, or other sensitive form, and technical behavior showed no phishing, credential-harvesting, cloaking, or wallet-drainer indicators.

EVIDENCE

- The homepage identifies the service as “Bitcoin Magazine | Bitcoin News, Analysis & Insights” and provides consistent editorial, subscription, store, book, and conference functions.
- The homepage contains one newsletter-email form and no sensitive form or untrusted submission destination.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist result.
- The domain was registered in 2011 and is approximately 15.21 years old; archival records contain 5,000 snapshots spanning 2011–2022 across 12 tracked years.

Regulatory Verification Notes

The examined pages provide identifiable editorial and commercial governance materials, including About, Editorial Policy, Jobs, Privacy Policy, Terms of Use, Contact, advertising, subscription, store, and event information. No financial-services license or registration number is presented, but that disclosure gap is proportionate to the site's stated role as a news and media publisher rather than an investment intermediary. Independent authority and reputation signals support an established public presence, while the site's registration proxy remains an administrative detail rather than an identity contradiction.

EVIDENCE

- The site's navigation links to About, Editorial Policy, Privacy Policy, Terms of Use, Contact, Advertise, Jobs, Store, Books, and Conference pages.
- Hosting telemetry identifies AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- The site's TLS certificate is issued by YE1, uses DV validation, and is valid to 2026-09-24T15:59:39+00:00.
- The site is ranked within the global top 1 million, with high page-authority signals.

What to Verify Next

For regulated procurement, sponsorship, or contractual engagement, confirm the applicable contracting entity and commercial terms through the published corporate, advertising, terms, and contact materials. Time-sensitive editorial or market claims should be corroborated against primary sources before being used in formal decisions.

EVIDENCE

- The homepage links to corporate, advertising, editorial-policy, terms, and contact materials suitable for engagement due diligence.
- The published business model identifies advertising, sponsored content, subscriptions, magazine and book sales, conferences, and media partnerships.
- The site links to established social channels including Facebook, Instagram, LinkedIn, Rumble, X, and YouTube.

Summary Verdict

The evidence supports a legitimate, established, and trustworthy website with a high-confidence suitability for normal interaction, including account login and standard use. No scam, impersonation, phishing, or identity-conflict indicators were identified.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer for the site, with observed addresses belonging to Cloudflare edge infrastructure rather than an exposed origin. The infrastructure is associated with AS13335, and this protective architecture is consistent with a professionally operated public media service.

Closing Assessment

Normal browsing, login, subscriptions, and standard account activity are appropriate; regulated or high-value engagements should follow the organisation's usual contracting and source-validation procedures.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status

LIKELY

Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bitcoinmagazine.com.

- The request stayed on bitcoinmagazine.com. It was not redirected to another domain. CLEAR
- Registration is published under Amazon Registrar, Inc.. CLEAR
- DNS for this domain is served by bitcoinmagazine.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-21. NOTED
- The earliest public archive of this site is from 2011-07-01. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bitcoinmagazine.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
