Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an informational Bitcoin market and blockchain dashboard presenting real-time prices, order books, trades, charts, network statistics, mining-pool data, mempool activity, live transactions, and related news navigation. Its apparent purpose is to provide public cryptocurrency market and network intelligence rather than financial services or account-based transactions.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent informational function, with no phishing indicators, credential-harvesting forms, deceptive financial promises, brand impersonation, or suspicious user actions. The site's continuous historical presence and clean external reputation support the conclusion that it is an established legitimate service.

- The homepage provides Bitcoin ticker data, exchange comparisons, charts, order books, network statistics, mining-pool information, and mempool data.
- The homepage contains no login form, sensitive form, wallet connection, or hidden form.
- The domain was registered in 2013 and is approximately 13.35 years old; archival records show 338 snapshots across 14 years, from 2013 through 2026.

Regulatory Verification Notes

The site appears informational and does not present a regulated financial-service offering or a licensing claim in the reviewed content. No license number or corporate registration disclosure was identified, which is a limited transparency point for institutional onboarding but not evidence of misconduct. The available reputation checks found no malicious or suspicious detections, and no broker-dataset match was identified.

- The homepage describes market-data and blockchain-information functions rather than advisory, custody, brokerage, or investment services.
- The site's domain registration lists GoDaddy.com, LLC as registrar, with registration continuing through 2027-03-31.
- The site's transport encryption uses a DV certificate issued by YR2, valid through 2026-10-31.

What to Verify Next

For formal procurement or regulated use, the prospective organization should confirm the responsible legal entity, support channels, and any licensing obligations applicable to the intended use through independent records. Standard browsing and ordinary interaction with the informational dashboard are appropriate.

- The homepage identifies the service through its Bitcoin market-data and network-statistics content.
- The site has an established archival record with regular activity and no detected repurposing.

- The observed external reputation checks reported zero malicious detections and zero abuse reports.

Summary Verdict

The website presents as a legitimate, established, trustworthy informational service with a low-risk operating profile. The evidence supports normal interaction, including account login where applicable and standard use, without indicators of impersonation, phishing, or abusive intent.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, with observed edge addresses in AS14061 operated by DigitalOcean, LLC; the origin server was not observable in the analysis. This protective arrangement reduces direct exposure of the origin and is a mitigating infrastructure signal, although it is not by itself proof of legitimacy.

Closing Assessment

The service is suitable for ordinary informational use and can be considered for routine organizational access, subject to the organization’s normal vendor and legal-entity checks for formal reliance.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bitcointicker.co.

- The request stayed on bitcointicker.co. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by digitalocean.com, across 3 name servers. NOTED
- The registration is paid up to 2027-03-31. NOTED
- The earliest public archive of this site is from 2013-04-25. CLEAR
- It is hosted on DIGITALOCEAN-ASN, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bitcointicker.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
