- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

BitStore is a Moroccan e-commerce website presenting computers, networking equipment, smartphones, software licenses, security products, and technology accessories for direct sale, with prices in Moroccan dirhams, product specifications, warranties, and delivery across Morocco.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent electronics-retail model, with detailed products, conditions, specifications, warranties, and delivery information rather than phishing, malware, financial manipulation, or impersonation content. External reputation checks were clean, and the domain has a measurable public traffic footprint, supporting a legitimate commercial presence.

- Homepage catalog contains detailed computer, phone, networking, software, and accessory listings with Moroccan-dirham pricing.
- Homepage behavior showed no login form, hidden sensitive form, wallet activity, clipboard hijacking, cloaking, or suspicious scripts.
- External reputation assessment recorded zero malicious and zero suspicious detections, with the domain ranked within the global top million.
- Domain registered in 2024 (~1.75 years old).

Regulatory Verification Notes

The site operates as a conventional electronics retailer rather than presenting a regulated financial service. The supplied content does not establish a licensing claim or registration number, so corporate and consumer-disclosure details remain a transparency item for ordinary commercial verification. No third-party broker match was identified, and the site's published owner record is YASSINE OULD LAFNICHIA.

- Homepage identifies the commercial model as direct sales of technology products, warranties, and Morocco-wide delivery.
- The site navigation includes "About Us" and "Contact Us" sections, although their detailed disclosures are not included in the supplied evidence.
- Served on AS13335 (Cloudflare, Inc.).
- TLS certificate issued by WE1 (DV), valid to 2026-09-24.

What to Verify Next

Before a business transaction, confirm the seller’s legal identity, invoice details, warranty terms, delivery conditions, and applicable consumer protections through the site’s own commercial documentation. For higher-value purchases, independently confirm the published contact and payment channels and retain order, warranty, and delivery records.

- Homepage displays product condition, specifications, pricing, warranty, and delivery information.
- Account and order-history functions are presented in the site navigation.
- The site offers dedicated “About Us” and “Contact Us” navigation paths.

Summary Verdict

BitStore presents as a legitimate, established e-commerce business with a coherent operating model, clean security signals, and no observed scam or impersonation contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

Cloudflare CDN and WAF protection place the observed service behind edge infrastructure, with all observed addresses associated with Cloudflare rather than an exposed origin. This reduces direct origin exposure and is a mitigating infrastructure signal, not independent proof of legitimacy.

Closing Assessment

Standard browsing, account use, and ordinary purchasing activity are appropriate, subject to normal commercial record-keeping and transaction controls.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bitstore.ma.

- The request stayed on bitstore.ma. It was not redirected to another domain. CLEAR
- Registration is published under CAP CONNECT. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-01. NOTED

- The earliest public archive of this site is from 2024-12-24. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bitstore.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
