

Is bkinstitute.net a scam? TrustSniffer's high-risk assessment: 0/100

bkinstitute.net

Verdict

0

OUT OF 100

CRITICAL RISK

bkinstitute.net shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Business Knowledge Institute (BKI) site: Spanish/English copy describing mission, vision, courses, seminars, contact info (address in Kissimmee, FL), phone and email, and a blog. Appears to be a legitimate local training provider with no financial investment or credential-harvesting indicators.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://bk institute.net/

What bk institute.net served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents Business Knowledge Institute (BKI) as a local Spanish/English business-training provider offering professional seminars, conferences, basic-to-advanced courses, and related training services, with an apparent revenue model based on paid educational programs and enrollment inquiries.

Scam/Impersonation Risk

The site's stated educational purpose and captured homepage content do not themselves show brand impersonation, credential harvesting, login functionality, or financial-investment claims. However, this benign presentation is outweighed by confirmed external threat detections: the domain is blacklisted, multiple security reputation systems classify it as malicious or suspicious, and the observed runtime included four suspicious inline scripts. The available evidence therefore supports a critical risk posture for sensitive interaction, despite the absence of page-level phishing mechanics or an identity contradiction.

EVIDENCE

- External reputation assessment recorded 10 malicious and 1 suspicious detections out of 16 evaluated results, with a Tier-1 threat signal present.
- The captured homepage contained no login form, hidden form, password submission, wallet connection, or credential-harvesting destination.
- Behavioral analysis recorded 4 suspicious inline scripts across 2 successful runs.
- Domain registration: 2020-06-19T18:18:27Z; age 6.17 years; registrar: HOSTINGER operations, UAB.
- Web-archive coverage: 27 snapshots spanning 2021–2025, with 5 years tracked.

Regulatory Verification Notes

The homepage and informational pages identify the business as Business Knowledge Institute and provide a Kissimmee, Florida address, telephone contact, social-media references, mission, vision, and training-service descriptions. The supplied content does not state a license claim or provide a license number; this is a regulatory and disclosure verification gap rather than, by itself, proof of fraud. The real-world operator connection remains likely but not independently verified. A local broker-reputation dataset contained no matching record, which is only a limited contextual signal and does not establish licensing or regulatory status. The valid transport certificate and identifiable hosting arrangement are technical positives, but they do not overcome the external reputation findings.

EVIDENCE

- Homepage and contact content identify Business Knowledge Institute and provide a physical address and telephone contact in Kissimmee, Florida.
- No license claim, licensing authority, or license number appears in the supplied business-model and page-content records.
- Hosted on AS47583, AS-HOSTINGER — Hostinger International Limited, CY; resolved service country: GB.
- TLS certificate: issuer YE2; validation level DV; valid to 2026-09-21T17:49:46+00:00.

What to Verify Next

Before any account creation, credential submission, payment, or enrollment transaction, an institution should independently confirm that the Florida business, its operators, and its training offerings correspond to a verifiable legal entity. Any applicable education, professional-training, or consumer-business authorization should be checked directly with the relevant official registry. Contact and payment instructions should be validated through an independently sourced channel, and endpoint controls should remain enabled when accessing the domain because of the confirmed reputation detections.

EVIDENCE

- The supplied identity linkage is assessed as likely rather than independently verified.
- The captured site is informational and does not expose a sensitive submission workflow.
- No applicable licensing authority or registration identifier is documented in the supplied page content.
- The external reputation result is sufficiently adverse to require independent confirmation before sensitive interaction.

Summary Verdict

The website has a critical trust posture and should not be treated as suitable for sensitive interaction. Its apparently ordinary educational presentation does not reconcile the confirmed blacklist and malicious-detection signals, and the operator's real-world identity is not independently established.

Infrastructure Integrity

The site is not shown behind a detected CDN or edge-IP layer; resolution identified two likely origin addresses and no edge addresses, including 82.25.87.45. This reduces the mitigating value of protective infrastructure, while the identifiable hosting environment does not itself establish legitimacy.

Closing Assessment

Prospective users and institutions should restrict activity to non-sensitive review until the operator, applicable authorization, and transaction channels have been independently validated.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bkinstitute.net.

- The request stayed on bkinstitute.net. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-19. NOTED
- The earliest public archive of this site is from 2021-11-28. CLEAR
- It is hosted on AS-HOSTINGER, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bkinstitute.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
