

Is blackmountaintrans.com legit? TrustSniffer's high-trust assessment: 100/100

blackmountaintrans.com

Verdict

100

OUT OF 100

HIGH TRUST

blackmountaintrans.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Local Scottsdale transportation provider website offering booking and quote requests, fleet information, areas served, contact details, and FAQs. Primary actions: call, email, or submit a booking request form.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Black Mountain Transportation is a Scottsdale-area ground transportation provider offering airport transfers, local car service, private hire, fleet options, booking requests, and fare quotations through telephone, email, and an online request form.

Scam/Impersonation Risk

No scam, phishing, impersonation, blacklist, or identity-contradiction signals were observed. The site presents a conventional local-service booking model rather than a deceptive financial or credential-collection workflow: its primary actions are calling, requesting a quote, or submitting trip details, with no login form, hidden form, wallet connection, password collection, or suspicious external submission behavior detected. The available evidence therefore supports a low scam and impersonation risk assessment, while the operating entity itself remains independently unverified.

EVIDENCE

- The homepage identifies Black Mountain Transportation and describes Scottsdale car service, airport transfers, professional drivers, and fleet options.
- The site's booking and contact analysis identified one booking/contact form with no sensitive form and no untrusted destination.
- Interactive testing recorded zero external XHR or POST activity, zero hidden forms, zero wallet-provider activity, and no cloaking or suspicious inline scripts.
- External reputation checks recorded zero malicious detections, zero suspicious detections, no abuse reports, and no blacklist or phishing hit.

Regulatory Verification Notes

The site claims to be "Licensed and Insured" and "Fully certified for Scottsdale and Phoenix operations," but the supplied pages do not provide a licensing authority or license number that independently substantiates those statements. This is a regulatory-disclosure verification gap, not evidence of a scam. The available evidence remains consistent with an established, apparently legitimate local transportation website: the domain is long-established, the site contains substantial service and contact content, and registration is recorded through GoDaddy.com, LLC. Registrant privacy is an administrative limitation rather than an identity contradiction, and no conflicting legal-entity names were identified. A third-party broker dataset produced no match; that result is contextual and is not a licensing determination.

EVIDENCE

- Domain registration: 2011-07-14; age 15.11 years; registrar GoDaddy.com, LLC; expiry 2028-07-14.
- The homepage and About Us content state "10+ Years Local Experience," describe professional drivers, and present the business as serving Scottsdale and nearby areas.
- The site navigation includes About Us, Contact Us, Privacy Policy, and Terms and Conditions pages.
- The site's transport encryption uses a DV certificate issued by YE2, valid to 2026-10-30.

What to Verify Next

Before a credential or payment interaction, independently confirm the business identity, operating authorization, insurance status, cancellation terms, and payment-protection arrangements through an official municipal or state source and an independently obtained contact channel. The licensing and insurance claims should be matched to the relevant Scottsdale or Phoenix transportation requirements, and the booking confirmation should clearly identify the service provider, fare, pickup details, and applicable cancellation conditions.

EVIDENCE

- The homepage provides the service description and the claims regarding licensing, insurance, and certification that require independent confirmation.
- The Contact Us page and booking workflow provide the operational channels for obtaining a written quote and confirmation.
- The Terms and Conditions and Privacy Policy links provide the appropriate locations for reviewing service and data-handling terms before submission of trip information.

Summary Verdict

The website has a **high-trust, low-risk posture** and the evidence is consistent with an established, apparently legitimate local transportation service. No contradictory abuse, phishing, impersonation, or identity signals were observed, although the real-world operator connection is not independently verified.

Infrastructure Integrity

The site resolves directly to a single hosting address on Hostinger infrastructure rather than through a detected CDN edge network. This provides no additional edge-layer separation, but the observed hosting configuration is a normal web-hosting arrangement and does not create a negative finding by itself.

EVIDENCE

- Hosting resolved to one IP address with zero detected CDN edge IPs and one likely origin address.
- Infrastructure resolution status was resolved, with no detected CDN or WAF vendor.

Closing Assessment

Normal browsing and service inquiry are proportionate to the assessed posture; before committing funds or supplying account or payment information, ordinary independent checks of the provider, transaction terms, and available payment protections should be completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of blackmountaintrans.com.

- The request stayed on blackmountaintrans.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2028-07-14. CLEAR
- The earliest public archive of this site is from 2013-04-30. CLEAR
- It is hosted on AS-HOSTINGER, from a server in CY. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about blackmountaintrans.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
