

Is blanchevetements.com safe? TrustSniffer's low-trust assessment: 40/100

blanchevetements.com

Verdict

40

OUT OF 100

LOW TRUST

blanchevetements.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Retail ecommerce site for Blanche Vêtements (menswear) in Alençon, France. Shows address, phone, product listings, brands, shipping info and contact email. No obvious phishing or crypto/financial investment activity.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What blanchevetements.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is an online and brick-and-mortar French menswear retailer presenting clothing and accessories for men, including a product catalogue, branded collections, shipping information, customer-account access, and store contact details; its apparent business model is conventional retail sales through online orders and in-store purchases.

Scam/Impersonation Risk

No page-level phishing, crypto-investment, wallet, or obvious brand-impersonation indicators were identified, and the storefront content is consistent with a small clothing retailer. However, this benign presentation is materially outweighed by confirmed external contradiction: three malicious detections were recorded and the domain was identified by two external blacklist sources. The real-world operator connection remains likely rather than independently verified, so the site should be treated as unsuitable for sensitive interaction until the reputation finding is resolved.

EVIDENCE

- The homepage presents menswear retail content, product listings, shipping information, and store details; page analysis found no phishing or brand-impersonation indicators.
- External reputation checks recorded 3 malicious detections and a confirmed blacklist hit from 2 sources.
- Domain registration: 2007-04-20; age 19.35 years.
- Archive record: first seen 2008-01-20, last seen 2025-07-11, with 18 years tracked.

Regulatory Verification Notes

The site provides an apparent retail identity and ordinary customer-facing business information, but the supplied pages do not present a legal-entity registration or licensing number. For a clothing retailer, this is a disclosure and merchant-verification gap rather than proof of misconduct; nevertheless, the operator cannot be treated as independently verified on the available evidence. The external broker-reputation dataset returned no match, which is only a limited contextual signal and does not establish licensing or regulatory standing.

EVIDENCE

- The homepage and contact/store pathways identify Blanche Vêtements and provide business contact and location information.
- No licensing authority or license number is presented in the available business disclosures.
- Hosting: AS16276, OVH - OVH SAS, France.
- TLS certificate: issuer YE1, DV validation, valid to 2026-10-26T05:20:04+00:00.

What to Verify Next

An independent check should confirm that the legal business behind the storefront corresponds to the published retail identity and that the business is currently trading through independently sourced records. Before any account creation or purchase, the merchant's terms, returns process, delivery obligations, and payment protections should be confirmed through sources not controlled by the website. Any external reputation warning should also be rechecked through current, independent security channels before sensitive use.

EVIDENCE

- The site exposes customer-account and ordering functionality, making independent merchant-identity and payment-protection checks relevant.
- The available business pages provide sufficient identifying information for an offline or registry-based merchant check.
- The site's stated retail model does not itself establish licensing, registration, or ownership.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interactions**. The site appears to present a plausible retail storefront, but the confirmed external contradiction prevents a positive trust determination, and the operator's identity remains only likely rather than proven.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, with all observed addresses belonging to edge servers and no origin-server candidate identified in the analysis. The infrastructure is hosted through OVH - OVH SAS and provides a mitigating layer against direct exposure, but this protection does not establish legitimacy or offset the external reputation concern.

Closing Assessment

Activity should remain limited to non-sensitive viewing until independent merchant checks and the external reputation issue have been satisfactorily resolved; login, credential submission, and payment activity should not proceed in the interim.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of blanchevetements.com.

- The request stayed on blanchevetements.com. It was not redirected to another domain. CLEAR
- Registration is published under OVH, SAS. CLEAR
- DNS for this domain is served by ovh.net, across 2 name servers. NOTED

- The registration is paid up to 2027-04-20. NOTED
- The earliest public archive of this site is from 2008-01-20. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about blanchevetements.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
