

Is blasttop.com safe? TrustSniffer's low-trust assessment: 40/100

blasttop.com

Verdict

40

OUT OF 100

LOW TRUST

blasttop.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Website for 'The Blast Top', an India-based company providing abrasive blasting, protective paint and powder coatings, stainless steel finishing, and consultancy services. The site contains address, phone, email, service descriptions, certificates, and a contact form. No finance-related offers or credential harvesting detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What blasttop.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a small corporate site for The Blast Top, presenting an India-based industrial services business focused on abrasive blasting, metal surface preparation, protective paint and powder coatings, stainless-steel finishing, and related consultancy. Its apparent commercial model is project-based service delivery supported by company information, portfolio material, contact details, and a lead-generation form.

Scam/Impersonation Risk

The site's visible content is consistent with a local industrial-services company and does not show login functionality, credential collection, financial offers, or other page-level phishing mechanics. However, this benign presentation is outweighed by a confirmed external blacklist finding, creating a material contradiction between the site's stated business purpose and its external reputation. The available evidence does not establish brand impersonation or phishing on the pages reviewed, but the blacklist finding is sufficient to make sensitive interaction inappropriate until independently resolved.

EVIDENCE

- An external reputation assessment records the domain as blacklisted; separate checks recorded 1 malicious and 1 suspicious detection.
- The homepage contains a corporate-services presentation and a single contact form, with no login form or password-collection field.
- Historical records show 21 archive snapshots from 2018-08-04 through 2025-07-10, covering 8 years.

Regulatory Verification Notes

The About and Contact content identifies “The Blast Top,” gives an Ahmedabad address and telephone number, and describes services involving coatings, finishing, and technical consultancy. The site does not present a license authority or license number, so the legal and regulatory status of the operating entity remains unverified rather than established. The domain is registered through GoDaddy.com, LLC, and the site uses a valid domain-validated TLS certificate; these are technical or administrative indicators and do not independently confirm the operator's legal identity or any regulatory authorization.

EVIDENCE

- The site's About and Contact content identifies The Blast Top and provides the address “338, 3rd Floor, Krish Arcade, Nr. Adani Circle Ring Road, Ramol, Ahemdabad,” together with a telephone contact.
- The site presents no license authority or license number in the reviewed business and service content.
- Registered 2017-11-11 (~8.78 years old) through GoDaddy.com, LLC.
- TLS certificate issued by YE1 (DV), valid to 2026-11-10.

What to Verify Next

An independent check should confirm that the named business exists at the published Ahmedabad address and that the telephone contact reaches the same entity. Where the proposed engagement involves regulated coating work, certifications, or contractual project delivery, the relevant certificates and company credentials should be validated with their issuing bodies or through an independent business registry. Any contact or appointment process should be initiated only after the external blacklist finding has been explained and cleared through an authoritative channel.

EVIDENCE

- The Contact page provides a physical address, telephone number, and contact form for appointment or enquiry purposes.
- The homepage and service pages refer to certified experts, certificates, and technical consultancy.
- The site's business model is presented as project contracts and service fees rather than financial or investment activity.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The site appears to present a coherent industrial-services proposition, but the confirmed external reputation contradiction and unverified operator identity prevent a reliable legitimacy determination.

Infrastructure Integrity

The site resolves directly to a single likely origin rather than through a detected CDN edge, so there is no identified CDN-layer mitigation separating the public service from its origin infrastructure. The hosting arrangement is technically identifiable, but hosting protection or stability would not establish legitimacy.

EVIDENCE

- Resolved to 145.79.210.30 in Germany, with 1 unique IP and 1 likely origin IP; no CDN was detected.
- Served from AS47583, registered in the RIPE NCC region.

Closing Assessment

Pending independent resolution of the reputation finding and confirmation of the operating entity, activity should remain limited to non-sensitive review; credentials, confidential information, and financial commitments should not be submitted.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of blasttop.com.

- The request stayed on blasttop.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-11-11. CLEAR
- The earliest public archive of this site is from 2018-08-04. CLEAR
- It is hosted on AS-HOSTINGER, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about blasttop.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
