- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Blaze Themes is an established e-commerce website offering free and paid WordPress themes, plugins, bundled products, customization services, documentation, tutorials, and technical support, with downloadable software and related account services forming its apparent business model.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, malicious reputation findings, or other substantive fraud indicators were observed. The site's commercial purpose is consistent across the homepage, product presentation, and support resources, while its long historical presence and significant global traffic footprint provide strong provenance. Interactive testing also identified no cloaking, hidden forms, suspicious scripts, clipboard interference, cryptocurrency-wallet activity, or external password submission.

- The homepage presents a coherent WordPress-product catalogue, customer testimonials, payment availability, support resources, and links to privacy, terms, and refund policies.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing result, and no reported abuse associated with the assessed infrastructure.
- The domain holds global traffic rank 31,931, placing it within the top one million websites.
- Web archives contain 1,316 snapshots spanning 2012-04-03 to 2026-07-27, covering 15 tracked years without evidence of suspicious repurposing or semantic drift.

Regulatory Verification Notes

The site operates as a conventional WordPress software vendor rather than a regulated financial or investment service. Its homepage claims GDPR compatibility and GPL compatibility for its themes; these are product and compliance representations, not claims of governmental licensing. Policy, refund, support, documentation, tutorial, FAQ, contact, and account links create a reasonably complete commercial disclosure framework, and the available evidence presents no conflicting legal identities. The domain is registered through HOSTINGER operations, UAB and has an established registration history.

- WHOIS records show registration on 2016-11-25 through HOSTINGER operations, UAB, making the current registration approximately 9.68 years old; expiry is recorded as 2026-11-25.
- The homepage states that the themes are GDPR compatible and GPL compatible and advertises regular updates and ticket-based support with responses within 12 hours.

- The site navigation exposes privacy, terms, refund, contact, FAQ, documentation, video-tutorial, and support-ticket resources.
- No matching broker profile or financial-regulatory claim was identified in the supplied third-party context, consistent with the site’s non-financial business model.

What to Verify Next

Prospective purchasers should confirm that the selected theme or plugin supports the intended WordPress version, review the applicable update and support period, and retain the product-specific licensing and refund terms before purchase. Organizations deploying the software should also perform normal software-supply-chain controls, including downloading through the authenticated account area, validating available release information, and testing the package in a controlled environment before production deployment.

- Product pages should be checked against the homepage’s representations concerning updates, documentation, translation readiness, and setup support.
- The terms and refund pages provide the appropriate source for confirming purchase-specific rights and remedies.
- The documentation, tutorials, and support-ticket pages provide the relevant channels for validating compatibility and post-purchase assistance.

Summary Verdict

The website is legitimate, established, and trustworthy. Its coherent commercial identity, durable provenance, clean external reputation, meaningful traffic footprint, and benign observed behavior converge on a high-confidence trust posture with no contradictory risk signals. Normal interaction, including account login, purchasing, and standard use, is appropriate.

Infrastructure Integrity

The site is served from AS47583, operated by Hostinger International Limited, with hosting observed in Ukraine. No CDN or WAF was identified, and three likely origin addresses were observable; this is a conventional hosting configuration rather than evidence of legitimacy or misconduct. Transport encryption uses a valid domain-validated certificate issued by YE2, expiring on 2026-10-02.

Closing Assessment

Prospective users may engage normally, applying routine e-commerce due diligence and standard software testing before production deployment.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of blazethemes.com.

- The request stayed on blazethemes.com. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-25. NOTED
- The earliest public archive of this site is from 2012-04-03. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about blazethemes.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
