Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is an online retail storefront branded “Kimatsu – Home appliances,” presenting ceiling and BLDC fan products, promotional offers, warranty registration, shopping functionality, and customer contact channels for the apparent sale and fulfilment of home appliances.

Scam/Impersonation Risk

The site’s visible content presents an ordinary retail model and the supplied page review identified no immediate product, payment, phishing, or impersonation indicators. That benign presentation is outweighed by confirmed external threat signals: the domain is blacklisted by the cited sources, with 14 malicious detections and one suspicious detection recorded in the evaluated reputation results; Kaspersky and Sophos were among the vendors reporting a threat. This is a material contradiction to the storefront’s ordinary appearance and supports a security posture in which login, credential submission, account creation, and financial transactions should not be undertaken. The domain’s apparent operator identity is only assessed as likely rather than independently verified. No conflicting legal-entity names or direct brand-impersonation finding were observed. Evidence:

- The homepage and product pages present BLDC fan listings, including KBFN 30, KBFN 40, KBFN 50, and KBFN 60, together with shopping and promotional functions.
- External reputation telemetry recorded 14 malicious detections and 1 suspicious detection; Kaspersky and Sophos were identified among the flagged vendors.
- The registered domain was created on 2024-07-19 and is approximately 2.09 years old; the registration record names KIMATSU INDIA PVT LTD and GoDaddy.com, LLC as registrar.
- Archive records show 11 snapshots spanning 2023–2025, covering 3 years of tracked history, with no detected repurposing or semantic drift.

Regulatory Verification Notes

The supplied pages include About, Contact, Privacy Policy, Shipping Policy, Cancellation and Returns, and Terms & Conditions links, as well as a Mumbai address, telephone contact, and a customer-facing contact or callback form. The site does not display a licensing or registration number in the reviewed content; for an appliance retailer this is a regulatory and commercial verification gap rather than proof of fraud. The page also contains broad marketing statements such as “100% Guarantee,” “Easy Returns,” “No Questions Asked,” “Certified Organic,” and “At Lowest Price,” while portions of the promotional copy contain unfinished placeholder text. These inconsistencies reduce disclosure quality and make the stated commercial terms important to validate independently. The available third-party broker dataset reported no match, but that result is only contextual and does not establish legal status or authorization. Evidence:

- The footer and contact area identify “201, Tirupati Udyog, I.B.Patel Rd, Goregaon East, Mumbai – 400063, India,” together with a telephone number and published email contact.
- The homepage links to shipping, cancellation and returns, privacy, warranty, and terms pages, but the reviewed content contains no displayed license or registration number.
- The homepage includes the claims “100% Guarantee,” “Easy Returns,” and “No Questions Asked,” alongside unfinished text reading “I am text block. Click edit button to change this text.”
- The site’s hosting infrastructure is AS47583, identified as AS-HOSTINGER – Hostinger International Limited, CY; its TLS certificate is issued by YE1 using DV validation and is valid to 2026-10-30.

What to Verify Next

Before any sensitive interaction, an independent party should confirm that the named Indian business exists at the stated address and that the telephone and customer-service channels are controlled by that business. The applicable Indian business, consumer-protection, tax, and product-warranty requirements should be checked against authoritative registries or documentation, and the return, cancellation, warranty, delivery, and refund terms should be confirmed before an order is placed. Any payment should use a method offering strong dispute and chargeback protection, with no reuse of credentials from other services. Evidence:

- The Contact page provides a physical address, telephone contact, and customer-contact form that can be checked through an independent route.
- The homepage and footer advertise warranty registration, shipping, cancellation, returns, and terms pages requiring consistency review before purchase.
- The account area includes login, registration, and warranty-card functions, creating a sensitive interaction surface despite the absence of a detected login form in the captured homepage content.

Summary Verdict

The website has a **critical trust posture** because confirmed external threat detections and blacklist status materially conflict with its otherwise conventional retail presentation. The available evidence does not support treating the site as suitable for sensitive interaction, account access, credential submission, or financial activity.

Infrastructure Integrity

The site resolves directly through Hostinger infrastructure rather than a detected CDN edge, with four likely origin addresses identified and no CDN vendors observed. Transport encryption is present through a valid DV certificate, which protects the connection in transit but does not establish the safety or legitimacy of the operator or website content.

Closing Assessment

The appropriate institutional response is to block or isolate sensitive interaction with the site pending independent remediation evidence and confirmation from authoritative security and business-identity channels.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bldcfans.co.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
