

Is bleedai.com safe? TrustSniffer's low-trust assessment: 40/100

bleedai.com

Verdict

40

OUT OF 100

LOW TRUST

bleedai.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

BleedAI is an AI-driven B2B outbound marketing agency offering a fixed-price 'Outbound Sprint' and managed outbound services focused on deliverability, list targeting, and pipeline generation; the site contains case studies, testimonials, and a Calendly booking flow.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What bleedai.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

BleedAI is a B2B outbound marketing agency website presenting an AI-assisted “Outbound Sprint,” managed outbound campaigns, deliverability engineering, lead targeting, case studies, testimonials, and a Calendly-based strategy-call booking flow; its apparent business model is to sell fixed-price campaign setup and ongoing managed marketing services.

Scam/Impersonation Risk

The site’s substantive presentation is consistent with a professional marketing-services business and the analyzed pages contained no detected login form, hidden form, wallet interaction, or explicit impersonation indicators. However, the domain has a confirmed external blacklist hit and multiple malicious or suspicious reputation detections, creating a material contradiction that outweighs the otherwise coherent service presentation. IP-level abuse reporting was attributed to shared provider infrastructure, was whitelisted with zero confidence, and was discounted as non-specific to this website; that signal should not be treated as equivalent to a domain-specific finding. No conflicting legal-entity names were observed across the supplied identity material.

EVIDENCE

- The homepage describes the fixed-price “Outbound Sprint,” managed outbound services, deliverability work, pipeline generation, case studies, testimonials, and a Calendly booking flow.
- External reputation checks recorded 2 malicious and 2 suspicious detections for the domain, with a confirmed blacklist hit across two external sources.
- The domain registration record shows registration on 2018-10-11, an age of 7.86 years, and expiration on 2028-10-11.

Regulatory Verification Notes

BleedAI presents itself as a B2B marketing agency rather than a regulated financial or investment service. The homepage identifies Taha Anwar as founder and links to terms and privacy pages, but the supplied evidence does not independently verify the operating legal entity, and no licensing or registration number is disclosed in the analyzed business content. This is a verification and contracting-transparency gap, not by itself evidence of fraud. The available identity linkage is therefore only apparent rather than proven.

EVIDENCE

- The homepage identifies “Taha Anwar” as founder of BleedAI and links to `/terms` and `/privacy-policy`.
- The supplied business content contains no claimed license authority or license number.
- The site's TLS certificate is issued by YR1 at DV validation level and is valid until 2026-11-13.

What to Verify Next

Before any paid engagement, the prospective customer should confirm the contracting entity, invoicing details, refund and termination terms, and the person authorized to bind the business through an independent channel. The terms and privacy pages should be reviewed for the legal entity responsible for service delivery, data processing, and dispute handling. The booking flow should be checked to ensure that any subsequent payment or document exchange occurs through independently confirmed business channels rather than solely through links received during the sales process.

EVIDENCE

- The terms page is the appropriate source for the contracting party, service obligations, refunds, and dispute provisions.
- The privacy page is the appropriate source for the data controller and handling of prospect and client information.
- The homepage's single booking/lead-capture form does not request sensitive credentials in the analyzed content.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site has a coherent commercial presentation, but the confirmed external reputation contradiction prevents the available content from supporting routine trust in sensitive engagement.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, and the observed address is an edge server rather than an independently visible origin. This provides a useful exposure-mitigation layer, but protective hosting infrastructure does not establish the legitimacy of the operator or neutralize the external reputation findings.

EVIDENCE

- The site resolves through edge IP 216.198.79.1 on AS16509, hosted by AMAZON-02 — Amazon.com, Inc., US.
- The observed infrastructure reports one CDN edge IP and zero likely origin candidates.

Closing Assessment

The appropriate posture is passive review until the domain reputation issue and the contracting identity are independently resolved; credentials, confidential business information, and financial commitments should not be submitted during the interim.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat

Signals weighed against the site

- AbuseIPDB: 96 reports on hosting IP 216.198.79.1 (Vercel, Inc, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	37%
• Trusted social count=1	

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bleedai.com.

- The request stayed on bleedai.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2028-10-11. CLEAR
- The earliest public archive of this site is from 2018-11-08. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bleedai.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
