Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2005.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Blockstore.cl is a Chilean online retailer for sneakers, streetwear, apparel, and accessories, presenting branded product listings, prices, promotions, delivery, store-pickup, and customer-contact options through a Shopify storefront. Its apparent business model is conventional ecommerce sales supported by online checkout, shipping, and in-store collection.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent retail identity under the Blockstore name, with branded footwear and apparel categories, store-pickup information, promotional content, and links to established social-media profiles. The site does not exhibit detected phishing, impersonation, malicious-content, or high-risk abuse indicators. Its long registration history, sustained historical continuity, established traffic footprint, and clean external reputation converge on a legitimate operating website rather than a recently created or repurposed storefront.

EVIDENCE

- Domain registration records show registration in 2003, approximately 23.08 years old, through NIC Chile.
- Historical records contain 336 snapshots spanning 2005–2026, with 22 years tracked.
- The homepage and product pages show a consistent Blockstore ecommerce identity, branded product catalog, pricing, promotions, and store-pickup messaging.
- External reputation checks recorded zero malicious detections, zero suspicious detections, and no blacklist or impersonation finding.

Regulatory Verification Notes

The reviewed content supports an identifiable commercial retail operation, including the registered holder COMERCIAL GE2 LTDA and a Chilean retail presentation. The available pages do not state a licensing authority or registration number; for this type of retail activity, that is best treated as a disclosure item for ordinary business verification rather than evidence of deception. A separate broker-reputation check produced no matching result, which is contextual support only and not a legal or regulatory determination.

EVIDENCE

- Registration records identify NIC Chile as registrar and COMERCIAL GE2 LTDA as the recorded holder.
- The homepage and contact/store-information content describe retail sales, shipping, and in-store pickup in Chile.
- Hosting infrastructure resolves through AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- The site's TLS certificate is issued by YE2, uses Domain Validation (DV), and is valid through 2026-10-27.

What to Verify Next

Before establishing a commercial relationship beyond ordinary purchases, the business's current registration and any consumer-commerce obligations should be confirmed through the relevant Chilean public registry. The terms, privacy, returns, delivery, and store-pickup conditions should be reviewed against the intended transaction, and official contact channels should be confirmed through the site's published pages and an independent offline route where material value is involved.

EVIDENCE

- The site exposes dedicated contact, privacy-policy, and terms pages.
- The storefront provides product checkout and store-locator/contact forms without detected sensitive login forms or hidden forms.
- Product pages and store-information content provide the operational details needed to compare advertised delivery, pickup, and returns conditions with the planned purchase.

Summary Verdict

Blockstore.cl has a legitimate, established, and trustworthy website posture. The convergence of coherent retail content, sustained domain provenance, clean reputation, stable operation, and identifiable commercial infrastructure supports normal interaction, including account login and standard purchasing activity.

Infrastructure Integrity

The website is protected by Cloudflare's CDN and WAF, with observed traffic served through the Cloudflare edge at 23.227.38.65; the origin server was not observable in this analysis. This arrangement mitigates direct exposure of the underlying origin and is a positive infrastructure-control signal, although it is supportive rather than proof of business legitimacy.

Closing Assessment

Normal account and purchasing activity may proceed, with routine attention to the published transaction, delivery, returns, and support procedures.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of blockstore.cl.

- The request stayed on blockstore.cl. It was not redirected to another domain. CLEAR
- Registration is published under NIC Chile. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-08-11. CLEAR
- The earliest public archive of this site is from 2005-06-02. CLEAR
- It is hosted on CLOUDFLARENET, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about blockstore.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
