

Is blog.de legit? TrustSniffer's high-trust assessment: 100/100

blog.de

Verdict

100

OUT OF 100

HIGH TRUST

blog.de appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

German editorial portal centered on a 2026 comparison of free and paid blog-building and hosting providers, supplemented by articles covering finance, technology, travel, lifestyle, nature, and home topics. Provider links are explicitly identified as commission-generating affiliate links.

Evidence status and limitations

Evidence completeness: UNKNOWN

Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established German editorial and comparison portal that helps visitors assess blog-building, hosting, website-development, personal-finance, technology, travel, lifestyle, and home-related services, earning commissions through clearly identified affiliate referrals.

Scam/Impersonation Risk

No blacklist, phishing, impersonation, or conflicting-identity indicators were observed. The domain's long and continuous historical record, substantial public traffic footprint, clean external reputation, and absence of credential-collection or deceptive browser behavior provide convergent evidence that this is a legitimate publishing operation rather than a fraudulent acquisition funnel.

- The domain record indicates registration in 2002 and an age of approximately 24.12 years.
- The web archive contains 5,000 snapshots from 19 June 2002 through 11 November 2020, covering 19 tracked years; no suspicious repurposing or semantic drift was established.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no external blacklist finding, and 0 reported hosting-IP abuse incidents.
- The homepage behavior assessment found no login form, hidden form, external credential submission, cloaking, clipboard manipulation, wallet interaction, or suspicious script activity.

Regulatory Verification Notes

The site presents itself as an affiliate-supported editorial publisher rather than as a bank, broker, lender, or other regulated financial-service provider. Its coverage of bank accounts, credit cards, mortgages, securities accounts, social trading, and credit products should therefore be understood as comparative information, not as evidence that the publisher provides or is licensed to provide those services. No licensing claim or regulator attribution is established in the supplied pages, and the absence of a broker-database match is merely contextual rather than a legal determination.

- The homepage explicitly identifies featured-provider links as commission-generating affiliate links.
- The homepage publishes comparison and informational material across consumer banking, credit, mortgage, brokerage, hosting, and related categories.
- The third-party broker dataset returned no matched broker entity for the site.
- The site is served from AS34788 by NMM-AS – Neue Medien Muennich GmbH in Germany; its DV TLS certificate was issued by YE1 and is valid until 21 September 2026.

What to Verify Next

Before acting on a comparison, the prospective customer should confirm the featured provider’s current price, eligibility rules, contractual terms, and—where a financial product is involved—authorization in the relevant official registry. Outbound links should be checked for the intended provider domain before any purchase or application, and the publisher’s affiliate disclosures and methodology should be reviewed to understand potential commercial influence.

- The homepage’s principal comparison is dated 2026 and covers both free and paid blog-building and hosting providers.
- The editorial catalogue includes time-sensitive product reviews and comparisons, including bank accounts, payment cards, loans, property finance, and investment accounts.
- The assessed homepage contained no transaction, password, or other sensitive-data form; commercial conversion is conducted through referrals to featured providers.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong historical continuity, credible public usage, clean threat-reputation evidence, and content consistent with its disclosed editorial business model. No contradictory risk signals were identified, and normal interaction, including any standard account access offered by the site, is appropriate.

Infrastructure Integrity

The site resolves directly to two likely origin addresses rather than using a CDN or WAF, with hosting provided from Germany by Neue Medien Muennich GmbH. Direct origin visibility is a conventional hosting configuration—not evidence of illegitimacy—while valid transport encryption protects data in transit.

Closing Assessment

Standard use may proceed normally, with ordinary transaction-level due diligence applied to the independent providers and offers featured in the site’s comparisons.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of blog.de.

- The request stayed on blog.de. It was not redirected to another domain. CLEAR
- DNS for this domain is served by ai-dns.de, across 4 name servers. NOTED
- The earliest public archive of this site is from 2002-06-19. CLEAR
- It is hosted on NMM-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about blog.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
