- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Portuguese-language regional news blog covering Vitória da Conquista and wider Bahia, presenting frequently updated reporting on public safety, accidents, politics, community affairs, weather, obituaries, sport, and entertainment, with an apparent audience-supported model involving advertising, sponsored coverage, and social-media engagement.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or malicious reputation findings were observed. The homepage behaves as a content publication: it presents identifiable regional authorship, extensive editorial material, and no login, payment, deposit, investment-return, cryptocurrency, or sensitive-data collection mechanism. Its long-running registration and continuous historical presence strongly support an established local-news identity, although the sensational style of some headlines may reduce editorial reliability without indicating fraud.

- The homepage identifies the publication as “Blog do Rodrigo Ferraz” and provides dedicated local-news categories covering Vitória da Conquista and Bahia.
- The homepage contains no login form, hidden form, sensitive form, wallet-connect function, or detected brand-impersonation behavior.
- The domain was registered on 8 July 2013 and is approximately 13.08 years old; the registrant is recorded as Rodrigo Ferraz Cunha.
- The web archive contains 177 snapshots from 11 August 2013 through 13 October 2025, spanning 13 tracked years, with no detected suspicious repurposing or semantic identity shift.

Regulatory Verification Notes

The site operates as a news and blogging publication rather than a financial, investment, brokerage, or deposit-taking service. It makes no licensing claim, and the supplied homepage evidence does not establish a regulatory authorization requirement for its stated activity. Corporate or editorial-policy disclosures were not demonstrated in the reviewed material; this is a minor publication-transparency consideration, not evidence of impersonation or unlawful operation. No corresponding broker profile was identified in the supplied third-party broker intelligence, but that result has no material bearing on a regional news publisher.

- The homepage describes and organizes regional journalistic content rather than regulated financial products or services.
- The observed business model does not solicit deposits, promise returns, or request financial information.

- The homepage provides a public telephone contact and links to Facebook, Instagram, YouTube, and WhatsApp.
- The homepage's editorial presentation includes limited source attribution and lacks structured publishing metadata, affecting content-quality assessment rather than website legitimacy.

What to Verify Next

For institutional reliance on published reporting, individual claims should be corroborated against primary public records, official statements, or independently established news sources, particularly where headlines concern crime, deaths, accidents, or political events. Organizations considering advertising, sponsorship, or formal media engagement should confirm the publication's commercial terms, editorial responsibility, and official contact channels through an independently initiated exchange.

- The homepage prominently features urgent and attention-oriented headlines concerning violent crime, fatalities, accidents, and political developments.
- The site provides separate navigation for interviews, politics, police reporting, sport, obituaries, and regional news, making topic-specific source validation practicable.
- The homepage exposes no transaction or credential-entry workflow requiring additional consumer account controls.

Summary Verdict

The site presents as a legitimate, established, and trustworthy regional news publication. Its identity, historical continuity, clean external reputation, substantive content, and benign observed behavior converge consistently, with no evidence of scam activity or impersonation. Normal interaction, including standard site use and any ordinary account access that may be offered, is appropriate.

Infrastructure Integrity

The website is served through Cloudflare's CDN/WAF, and all observed addresses were Cloudflare edge nodes rather than the origin server. This mainstream protective layer reduces direct infrastructure exposure and supports availability and transport security, although it is a mitigating control rather than independent proof of legitimacy.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., US).
- Four Cloudflare edge addresses were observed; no origin-server candidate was exposed during the analysis.
- The site uses a valid domain-validated TLS certificate issued by WE1, valid until 10 September 2026.

Closing Assessment

Prospective users may interact with the site normally, while institutions relying on its reporting for consequential decisions should apply routine source-corroboration and counterparty due diligence appropriate to any independent media outlet.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of blogdorodrigoferraz.com.br.

- The request stayed on blogdorodrigoferraz.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-08. NOTED
- The earliest public archive of this site is from 2013-08-11. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about blogdorodrigoferraz.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
