Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Blog do Sena is an established regional news portal publishing dated editorial coverage of politics, public safety, health, sport, and events in Vitória da Conquista, Bahia, and Brazil, apparently operating as an advertising- or partnership-supported media outlet.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or malicious activity were observed. The site presents coherent regional-news branding, attributed and dated reporting, and a long, continuous history consistent with its current editorial purpose. Its established audience footprint and clean external reputation further support legitimacy.

- The homepage identifies the site as “Blog do Sena” and consistently presents categorized regional journalism without payment requests, financial promotions, or sensitive-data forms.
- The domain was registered in 2018 and is approximately 8.01 years old; registration records name RODRIGO RODRIGUES SOUZA as the owner.
- Web archives contain 101 snapshots from 2018-12-21 through 2026-07-15, covering 9 tracked years without evidence of suspicious repurposing or material semantic drift.
- Reputation checks recorded 0 malicious and 0 suspicious detections, no phishing or threat-list match, and placement within the top one million globally at rank 197,245.

Regulatory Verification Notes

The observed service is a general-interest news publisher rather than a financial, investment, payment, or other regulated transactional service. Consequently, no sector-specific licence is indicated by the site's apparent business model. The available homepage material does not establish a detailed legal-entity disclosure framework, but this is a limited publication-transparency consideration rather than evidence of deception or regulatory misconduct.

- The homepage describes and operates as a regional news portal, with sections for politics, police, health, sport, Bahia, Brazil, and Vitória da Conquista.
- The observed page contained no login form, hidden form, sensitive-input form, cryptocurrency functionality, or wallet interaction.
- The site is served from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).
- Transport encryption uses a valid DV certificate issued by WE1, valid through 2026-09-17.

What to Verify Next

Organizations conducting formal media due diligence may confirm the publisher’s legal name and editorial responsibility through its official contact channel, review any applicable privacy or advertising disclosures, and independently corroborate consequential reporting with primary sources. These are proportionate publication-governance checks and do not restrict ordinary use of the site.

- The site navigation includes a dedicated contact section that can be used to request publisher or editorial information.
- The homepage provides an Instagram presence as an additional channel for confirming the publication’s public identity.
- Articles are presented with dates, attribution, and subject categories, providing reference points for source-level corroboration.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence between its editorial identity, sustained provenance, stable behavior, audience presence, and clean threat reputation. No contradictory security or impersonation signals undermine normal interaction, including account login and standard use where such functions are offered.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF layer, with all four observed addresses operating as edge infrastructure and no exposed origin candidate. This reduces direct origin exposure and supports operational resilience, although protective hosting is appropriately treated as a security control rather than independent proof of legitimacy.

Closing Assessment

Prospective users may interact with the website normally, while applying routine source corroboration when relying on its reporting for consequential business, legal, or public-policy decisions.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of blogdosena.com.br.

- The request stayed on blogdosena.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-31. NOTED
- The earliest public archive of this site is from 2018-12-21. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about blogdosena.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
