

Is bluesoft.com.br legit? TrustSniffer's high-trust assessment: 80/100

bluesoft.com.br

Verdict

80

OUT OF 100

HIGH TRUST

bluesoft.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 65%.

What this site appears to be

Marketing and product pages for Bluesoft ERP — a cloud ERP SaaS targeted at retailers, describing features, AWS hosting, customer metrics, contact info, and resources like webinars and blog.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Bluesoft ERP is a corporate cloud enterprise-resource-planning platform for retailers and mid-sized to large businesses, presenting software features, customer use cases, support, professional services, and subscription-based commercial offerings supported by implementation and channel partnerships.

Scam/Impersonation Risk

No phishing, impersonation, malware, or other contradictory indicators were observed. The homepage is consistent with a corporate SaaS offering: it contains substantive ERP content, presents no sensitive login form, and does not exhibit wallet, cryptocurrency, or credential-harvesting behavior. External reputation checks also returned no malicious or suspicious detections, supporting a low scam and impersonation risk assessment.

EVIDENCE

- The homepage is classified as a corporate/product page for Bluesoft ERP and contains no sensitive form or external password-submission destination.
- The page analysis records no brand-impersonation indicators, no cryptocurrency signals, and no red flags.
- External reputation telemetry recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports.
- The domain was registered in 2001 and is approximately 25.38 years old; its archive contains 327 snapshots spanning 2002–2026, with 25 years tracked.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate software provider, but the real-world operator identity is not independently verified. The registration record names Bluesoft Consultoria em Informatica Ltda, while the supplied page material does not establish that this entity is the current contracting operator. The site presents a commercial ERP service rather than a financial product, and no regulatory license claim or license number is recorded; this is a disclosure point for ordinary commercial due diligence, not evidence of a scam. A separate broker-reputation dataset produced no match and should be treated only as contextual reputational information.

EVIDENCE

- The homepage and associated product materials describe a cloud ERP SaaS business with support, consulting, and contact resources.
- The site's privacy and cookie materials are present, but no license authority or license number is recorded in the supplied content.
- Registration telemetry lists Bluesoft Consultoria em Informatica Ltda as the domain owner.
- The site is hosted on AS16509 (AMAZON-02 - Amazon.com, Inc., US); its TLS certificate is issued by Amazon RSA 2048 M01, uses DV validation, and is valid to 2027-02-01.

What to Verify Next

Before credential or payment interactions, independently confirm the legal entity that will provide the service, contract with that entity, and the applicable cancellation, refund, service-support, and payment-protection terms. Where the intended service or jurisdiction requires licensing, confirm the relevant authorization directly with the applicable official registry. Official contact channels should also be confirmed through an independent business record or an offline route before sensitive account changes.

EVIDENCE

- The available content identifies a product and service offering but does not independently verify the contracting entity.
- Commercial interaction is implied by subscription, implementation, and consulting services.
- Privacy and cookie notices are available for review alongside the site's product and contact materials.

Summary Verdict

The overall posture is high trust and low risk, with evidence consistent with an established, apparently legitimate website. The principal qualification is that the operator's real-world identity remains unverified, so the trust conclusion should not be treated as proof of corporate identity.

Infrastructure Integrity

The site is served through Amazon infrastructure classified as a content delivery network, providing a mitigating layer against direct exposure of the service environment. This infrastructure supports operational stability but is not, by itself, proof of legitimacy.

Closing Assessment

Ordinary use is proportionate to the assessed posture, subject to independent confirmation of the contracting business, commercial terms, and payment protections before credentials or payments are submitted.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bluesoft.com.br.

- The request stayed on bluesoft.com.br. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2032-04-03. [CLEAR](#)
- The earliest public archive of this site is from 2002-02-16. [CLEAR](#)
- It is hosted on AMAZON-02, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bluesoft.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
