Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

BlueSteam is a South Africa- and UK-focused commercial web-hosting provider offering hosting packages, domain registration, website design, site-building tools, SSL certificates, spam protection, remote PC support, and related customer services through recurring subscriptions and add-on purchases.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed malicious reputation findings were observed. The homepage presents a coherent commercial service model with pricing, guarantees, policies, testimonials, customer-support functions, and established social channels; the business model and site content are consistent with a legitimate hosting provider. Historical records also show sustained continuity rather than suspicious repurposing.

- The homepage identifies BlueSteam as a web-hosting, domain-registration, and website-design provider and presents customer services, pricing, guarantees, and policies.
- Historical records contain 173 archive snapshots spanning 2001–2025, covering 25 years.
- The domain was registered through ENOM, INC. on 2005-06-08 and is 21.16 years old.
- External reputation checks recorded 0 malicious findings, 0 suspicious findings, and 0 AbuseIPDB reports.

Regulatory Verification Notes

The reviewed site includes Terms of Service, Privacy Policy, spam and abuse policies, guarantees, an About page, and contact facilities. No regulated financial activity is indicated; the offering is ordinary commercial hosting and support. A formal license or registration number was not identified in the reviewed site material, which is a limited disclosure point rather than evidence of deception. Domain-registration privacy is an administrative matter and does not create an identity contradiction.

- The site navigation exposes About, Terms of Service, Privacy Policy, UCE/Spam Policy, CGI Abuse Policy, Money Back Guarantee, and Uptime Guarantee pages.
- The homepage publishes a telephone contact, customer-support routes, and links to Facebook, X, WhatsApp, LinkedIn, and YouTube.
- The site's domain registrar is ENOM, INC.
- Transport security uses a valid DV certificate issued by WE1, expiring 2026-10-25.

What to Verify Next

For procurement or material service commitments, the prospective customer should confirm the applicable contracting entity, service terms, renewal and refund conditions, and official support channels through the site's published legal and contact pages. Where a particular jurisdiction requires registration for a supplied service, that status should be checked against the relevant official registry.

- The site provides Terms of Service, refund and uptime guarantees, and a dedicated Contact Us route.
- The service catalogue and pricing are presented on the homepage and supporting service pages.
- Customer-support functions include ticketing, tutorials, a knowledgebase, and client-area access.

Summary Verdict

BlueSteam presents as a legitimate, established, and trustworthy commercial service provider. The available evidence supports normal interaction, including account login and standard use, with no observed indicators of impersonation, phishing, or malicious intent.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with observed addresses belonging to CDN edge servers and no origin candidate identified. This reduces direct origin exposure and is a mitigating infrastructure characteristic, although protective hosting alone is not proof of legitimacy.

- Served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- Observed edge IPs: 104.21.61.120, 172.67.210.70, 2606:4700:3032::6815:3d78, and 2606:4700:3037::ac43:d246.
- TLS certificate validation level is DV; issuer WE1; valid to 2026-10-25.

Closing Assessment

Standard browsing, account access, service enrolment, and routine customer actions are appropriate, subject to normal commercial due diligence for any significant purchase or contractual commitment.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bluesteam.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
