- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Blupeak Advisors presents itself as a corporate professional-services website for Blupeak Advisors LLP, offering accounting, taxation, auditing, corporate-secretarial, business-support, and related consultancy services to individuals and businesses in Noida, India. Its apparent business model is fee-based advisory and compliance work, supported by service descriptions, contact information, an office address, testimonials, and links to social-media profiles.

Scam/Impersonation Risk

The principal risk indicator is a confirmed blacklist result supported by multiple external reputation detections, which materially outweighs the site's otherwise conventional corporate presentation. The homepage contains no visible login mechanism, sensitive form, wallet connection, suspicious script, or overtly fraudulent business feature, and no separate identity contradiction, impersonation finding, or confirmed phishing page is recorded. Nevertheless, the combination of the blacklist result and malicious reputation classifications means the website should be treated as unsuitable for credentials, financial submissions, or other sensitive interaction. The site also presents the Blupeak Advisors name while displaying a contact address on the rsaadvisory.com domain;

this is a contact-channel and identity-resolution inconsistency, although it does not by itself establish impersonation.

EVIDENCE

- The homepage describes Blupeak Advisors LLP as an accounting, taxation, auditing, and management-consultancy business and includes testimonials and contact details.
- External reputation telemetry recorded 9 malicious classifications and 1 suspicious classification; the site was also recorded as blacklisted.
- The homepage analysis found no login form, sensitive form, hidden form, wallet connection, wallet-drainer behavior, or suspicious inline scripts.
- The homepage displays “info@rsaadvisory.com” while branding the business as Blupeak Advisors.

Regulatory Verification Notes

The site’s stated professional-services model is ordinary for a consultancy, and the available page content is substantive rather than a parked or purely promotional shell. However, the supplied material does not show a license number, licensing authority, or independently verified professional registration for the accounting, taxation, auditing, or corporate-services claims. This is a regulatory disclosure gap requiring independent confirmation, not proof of fraud. The domain is long-established and registered through GoDaddy.com, LLC, but the site’s apparent legitimacy cannot be treated as independently proven because the operator identity remains only likely rather than verified.

EVIDENCE

- The homepage and service pages identify Blupeak Advisors LLP and list accounting, GST, taxation, auditing, international-taxation, litigation-support, intellectual-property, and registration services.
- The domain was registered on 2020-11-23 and is 5.74 years old; the registrar is GoDaddy.com, LLC.
- The supplied legal and service-page content contains no stated license number or licensing authority.
- The available broker-reputation dataset recorded no matching broker entity.

What to Verify Next

Before any engagement, an independent party should confirm Blupeak Advisors LLP and its Noida office through the relevant Indian corporate, tax, and professional registries, and confirm which named professionals are responsible for regulated services. Any engagement should use independently verified contact channels, a signed statement of work, clearly identified contracting and payment entities, and payment protections appropriate to the transaction. Sensitive credentials, financial information, or advance payments should not be submitted until those checks resolve the external reputation concern.

EVIDENCE

- The site identifies the business as Bluepeak Advisors LLP and places it in Noida, India.
- The stated services include auditing, taxation, GST compliance, corporate registrations, and government approvals, all of which warrant confirmation of the provider's applicable credentials.
- The site publishes a telephone number, office address, service descriptions, and social-media links that can be checked through independent channels.
- The site's transport encryption is present, but the certificate provides domain validation only and does not independently establish the operator's legal identity.

Summary Verdict

The overall posture is **critical trust risk**. The website has the appearance and content structure of a small professional-services business, but confirmed external reputation contradictions prevent a trustworthy assessment for sensitive interaction. Apparent business legitimacy and technical operability do not overcome the decisive reputation concern.

Infrastructure Integrity

Confirmed technical evidence shows hosting on AS47583, operated by AS-HOSTINGER / Hostinger International Limited, with infrastructure located in Ukraine. The site is not behind a detected CDN or WAF edge layer, and the resolved addresses are assessed as likely origin infrastructure; this provides less intermediary protection than a proxied deployment. Its transport encryption is a mitigating technical control only, not evidence of legitimate ownership.

EVIDENCE

- Served from AS47583 (AS-HOSTINGER – Hostinger International Limited, CY), IP address 92.113.23.117, country UA.
- TLS certificate issued by YE1 with DV validation, valid to 2026-10-21.
- Infrastructure resolution identified 4 unique IP addresses, 0 edge IP addresses, and 4 likely origin IP addresses.
- No CDN was detected in the infrastructure assessment.

Closing Assessment

Sensitive interaction should be withheld unless independent entity, professional-credential, contact-channel, and payment checks produce satisfactory results; until then, the site is appropriate only for limited, non-sensitive observation.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of blupeakadvisors.com.

- The request stayed on blupeakadvisors.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by dns-parking.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2026-11-23. [NOTED](#)
- The earliest public archive of this site is from 2021-11-26. [CLEAR](#)
- It is hosted on AS-HOSTINGER, from a server in UA. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about blupeakadvisors.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
