

Is bmcdigitalsolutions.com a scam? TrustSniffer's high-risk assessment: 0/100

bmcdigitalsolutions.com

Verdict

0

OUT OF 100

CRITICAL RISK

bmcdigitalsolutions.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

BMC Digital Solutions appears to be an online retail storefront for broadcast/production equipment with product listings, promotions, and basic support/shipping information. No obvious high-risk financial or credential-harvesting behavior detected in the provided content.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://www.bmcdigitalsolutions.com/>

What bmcdigitalsolutions.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

BMC Digital Solutions is an online retail storefront presenting broadcast and production equipment, including video, audio, lighting, cabling, satellite, and related workshop products, with sales promotions, shipping offers, support information, and direct shopping functionality.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional equipment retailer and does not show an obvious login form, credential-harvesting flow, cryptocurrency feature, or overtly deceptive product mechanism. However, that benign page presentation is outweighed by confirmed external threat detections: the domain is blacklisted by multiple sources, with malicious classifications from external reputation systems and detections from Kaspersky and Sophos. This is a material contradiction and supports a security posture in which account, credential, and payment interactions should be treated as unsafe. No identity contradiction, brand impersonation, or phishing indicator was identified in the supplied page content, but those absences do not offset the confirmed reputation findings.

EVIDENCE

- The homepage presents a standard ecommerce catalogue covering production, video, audio, cables, lights, and satellite equipment, including a listed Mini Converter SDI Distribution 4K product.
- External reputation telemetry recorded 9 malicious detections, 1 suspicious detection, and confirmed blacklist status from 2 sources; Kaspersky and Sophos were among the flagged vendors.
- The domain was registered on 2015-07-01 and is approximately 11.14 years old.

Regulatory Verification Notes

The website identifies itself as BMC Digital Solutions and provides navigation for About, Services, Clients, Partners, Support, and Contact, but the supplied content does not establish an independently verified legal operator or regulatory status. No licence claim or licence number is present in the available business information; for an equipment retailer this is a transparency and merchant-verification gap rather than standalone evidence of a scam. The available identity linkage is only likely, not independently verified. Registration through GoDaddy.com, LLC and valid transport encryption are positive administrative and technical signals, but neither proves the operator's legal identity or resolves the external threat findings.

EVIDENCE

- The homepage footer identifies "BMC Digital Solutions" and displays support, returns, delivery, and discount statements, but no licence number or regulatory authority.
- Domain registration telemetry lists GoDaddy.com, LLC as registrar, with an expiration date of 2027-07-01.
- The site is served from AS26496, AS-26496-GO-DADDY-COM-LLC / GoDaddy.com, LLC, US.
- The TLS certificate is issued by Go Daddy Secure Certificate Authority - G2, uses DV validation, and is valid to 2027-02-09.

What to Verify Next

Independent checks should confirm the merchant's legal name, physical business details, ownership of the stated social channels, and the authenticity of the advertised returns and delivery terms before any transaction. Payment should be limited to a method offering strong dispute and chargeback protection, and any contact or support channel should be confirmed through an independently obtained business record rather than relying solely on the website.

EVIDENCE

- The homepage advertises free delivery, 24/7 online support, and a money-back guarantee under 7 days; the operational and contractual scope of those claims should be confirmed.
- The site links to Instagram, Facebook, Twitter, and YouTube; those channels should be checked independently for consistent business identity and sustained activity.
- The available page content contains no sensitive form or login form, so any later request for credentials or payment information should be treated as a separate interaction requiring heightened scrutiny.

Summary Verdict

The overall posture is **critical trust risk**. The site may present as a conventional retailer, but the confirmed external threat and blacklist findings make sensitive interaction inappropriate and prevent the website from being treated as trustworthy for commerce or account-related activity.

Infrastructure Integrity

A CDN/WAF layer provides some mitigation against direct exposure and rapid infrastructure abuse, but protective infrastructure is not evidence of legitimacy. The observed address was an edge address associated with GoDaddy infrastructure, and an origin address was not observable in this analysis.

EVIDENCE

- The infrastructure exposed 184.168.106.13 as the sole observed edge IP, associated with AS26496, GoDaddy.com, LLC, US.
- CDN/WAF protection was present, with no likely origin-IP candidate identified.

Closing Assessment

Pending independent resolution of the security findings and merchant identity checks, activity should remain limited to non-interactive viewing; credentials and payment details should not be submitted.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [bmcdigitalsolutions.com](#).

- The request stayed on [bmcdigitalsolutions.com](#). It was not redirected to another domain. [CLEAR](#)
- Registration is published under [GoDaddy.com, LLC](#). [CLEAR](#)
- DNS for this domain is served by [domaincontrol.com](#), across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-07-01. [NOTED](#)
- The earliest public archive of this site is from 2016-10-14. [CLEAR](#)
- It is hosted on AS-26496-GO-DADDY-COM-LLC, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [bmcdigitalsolutions.com](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
