- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1997.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the official Banco do Nordeste portal, presenting personal, business, rural, microcredit, card, financing, institutional, transparency, and customer-support services. Its apparent business model is that of an established regional development bank providing retail and corporate banking, agricultural finance, public-sector financing, and related financial services.

Scam/Impersonation Risk

No blacklist, phishing, malware, brand-impersonation, or conflicting-identity indicators were observed. The site's substantive banking content, institutional navigation, historical continuity, and clean external reputation are consistent with an established website rather than a fraudulent or impersonating operation. Behavioral testing did identify hidden forms and suspicious inline scripts, but the page analysis found no login form, no sensitive form, no externally submitted password form, and no untrusted destination; these observations therefore do not establish a scam pattern.

EVIDENCE

- The homepage presents Banco do Nordeste banking, credit, microcredit, agricultural-finance, institutional, transparency, and support content, with no page-level red flags.
- Domain registration: 1996-04-24; age 30.32 years.
- Web archives contain 5,000 snapshots spanning 1997-04-11 through 2025-04-28, covering 29 tracked years.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist or phishing hit.

Regulatory Verification Notes

The available evidence is consistent with an apparently legitimate institutional bank website, but the real-world operator identity is not independently verified by this assessment. The site provides institutional, transparency, privacy, investor-relations, and customer-support pathways; however, the reviewed content does not state a licensing authority or license number, leaving a limited regulatory-disclosure gap rather than an indication of fraud. No separate broker-reputation match was identified, and the website's stated services align with conventional banking activity.

EVIDENCE

- The homepage links to “Institutional,” “Transparency and Accountability,” “Privacy and Data Protection,” “Investor Relations,” and customer-service areas.
- Hosting is recorded on AS264581 — BANCO DO NORDESTE DO BRASIL S/A, Brazil.
- TLS certificate: E-SAFER ORGANIZATION SSL CA [Run by the Issuer], OV validation, subject organization BANCO DO NORDESTE DO BRASIL SA, valid to 2026-12-19.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the official domain and contact routes through a trusted, separately sourced Banco do Nordeste channel. The applicable banking authorization and the institution's current legal and transaction terms should be confirmed through the relevant official registry or published institutional documentation, with payment-protection and cancellation arrangements reviewed for any specific transaction.

EVIDENCE

- The homepage provides customer-contact and support pathways suitable for independent callback or channel validation.
- The institutional and transparency sections provide the appropriate locations for checking current legal, governance, and service disclosures.

Summary Verdict

The overall posture is **high trust and low risk**, with no observed scam or impersonation contradictions. Available evidence is consistent with an established, apparently legitimate institutional website, while operator identity remains likely rather than independently proven.

Infrastructure Integrity

The site resolves directly to infrastructure associated with Banco do Nordeste in Brazil, with one observed IP and no detected CDN or WAF edge layer. This direct hosting alignment is a useful mitigating infrastructure signal, although infrastructure association alone does not prove operator identity.

Closing Assessment

Routine browsing is proportionate; before submitting credentials or making payments, ordinary independent checks of merchant identity, return-policy terms, and payment protections should be completed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100

Identity verification confidence	80%
- Identity verified on page - Trusted social count=4	
Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.	

What TrustSniffer observed

First-party facts recorded during the assessment of bnb.gov.br.

- The request stayed on bnb.gov.br. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by 121.3, across 2 name servers. [NOTED](#)
- The earliest public archive of this site is from 1997-04-11. [CLEAR](#)
- It is hosted on AS264581, from a server in BR. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bnb.gov.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
