

Is bndes.gov.br legit? TrustSniffer's high-trust assessment: 100/100

bndes.gov.br

Verdict

100

OUT OF 100

HIGH TRUST

bndes.gov.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 45%.

What this site appears to be

Official-looking BNDES (Brazilian Development Bank) site content describing financing options, recent financial results, programs for small businesses and contact/transparent reporting channels. No evident solicitation of sensitive credentials or direct payment flows in captured HTML.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What bndes.gov.br served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents BNDDES, Brazil's national development bank, offering information on financing programs, credit lines, business support, financial results, sustainable development, transparency, and official contact channels. Its apparent purpose is to provide public-sector banking information and route businesses and projects toward appropriate financing services.

Scam/Impersonation Risk

No contradictions were observed between the site's institutional presentation, technical identity signals, and external reputation results. The homepage identifies the organization as BNDDES and includes an explicit warning that it does not authorize consultants or intermediaries to facilitate, accelerate, or approve financing. Captured page behavior showed no login form, sensitive data form, wallet activity, hidden form, suspicious inline script, or direct payment flow. The available evidence is therefore consistent with an established, apparently legitimate public-service website, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage presents BNDES as “O banco nacional do desenvolvimento” and includes a “Fuja dos golpes!” warning concerning unauthorized intermediaries.
- Captured HTML contained no login form or sensitive form, and behavioral testing recorded zero wallet-connect, wallet-drainer, clipboard-hijack, or password-external-form events.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no external blacklist or phishing result identified.

Regulatory Verification Notes

The site provides institutional, financing, transparency, financial-results, contact, and reporting content consistent with a public national development bank. No conflicting legal-entity names or adverse broker-reputation association were identified. The captured material does not state a license or registration number; for this type of public institution, that is best treated as a disclosure point requiring confirmation through the relevant official government or institutional registry rather than as evidence of deception. The available evidence supports apparent institutional legitimacy, but does not independently prove the operator’s real-world identity.

EVIDENCE

- The domain was registered on 1995-10-30 and is 30.82 years old.
- The site is served from AS270694, identified as “BANCO NACIONAL DE DESENVOLVIMENTO ECONOMICO E SOCI, BR.”
- Transport security uses a GeoTrust TLS RSA CA G1 certificate with OV validation, issued to “Banco Nacional de Desenvolvimento Economico e Social,” valid through 2026-11-09.
- The site uses the sovereign “gov.br” domain space and links to Instagram and YouTube channels associated with its institutional presentation.

What to Verify Next

Before credential or payment interactions, an organization should confirm the relevant BNDES identity and financing channel through an independently sourced government directory or an offline contact route, rather than relying solely on links encountered in a message or advertisement. Any financing proposal should also be matched against the institution’s published terms, official support channels, applicable approval process, and payment-protection controls. The site’s warning about unauthorized intermediaries should be incorporated into operational checks.

EVIDENCE

- The homepage directs financing applicants to the appropriate channel and promotes the BNDES Impulso small-business credit platform.
- The homepage provides transparency and reporting navigation, including financial-results content and official contact pathways.
- The captured page contains no direct payment flow, sensitive submission form, or untrusted form destination requiring immediate validation.

Summary Verdict

The overall posture is **high trust and low risk**, with strong convergence between the site's institutional purpose, long operating history, public-sector presentation, clean external reputation, and coherent technical identity. It is evidence-consistent with an established, apparently legitimate website; however, the available evidence does not independently verify the real-world operator identity.

Infrastructure Integrity

The technical infrastructure is directly associated with the named Brazilian development-bank organization, and the site uses a valid organization-validated TLS certificate from a recognized certificate authority. No separate CDN, WAF, or origin-IP posture is supplied for assessment, so no additional infrastructure mitigation is assigned.

Closing Assessment

Normal informational use is proportionate to the assessed posture; before submitting credentials or making any payment, ordinary independent checks of institutional identity, applicable terms, and payment protections should be completed.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Identity verified on page
- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bndes.gov.br.

- The request stayed on bndes.gov.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by 101.37, across 2 name servers. NOTED
- It is hosted on AS270694, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bndes.gov.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
