- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

BNews is a regional Brazilian online news portal focused on politics, economics, entertainment, sports, health, and local reporting, with advertising, sponsored content, promotional offers, commercial contact channels, and newsletter functionality supporting its apparent publishing model.

Scam/Impersonation Risk

No contradictions were observed: there are no indications of phishing, brand impersonation, malicious reputation, or conflicting legal identities. The homepage presents a coherent editorial-news service rather than a sensitive financial or credential-harvesting interface, and it contains no login form, hidden form, password submission, wallet connection, or other observed mechanism associated with account compromise. Interactive behavior generated external traffic and substantial page changes, but these signals are reasonably attributable to advertising, analytics, and dynamic news content; the observed behavior included no cloaking, credential collection, wallet activity, clipboard manipulation, or executable abuse pattern. The available evidence therefore supports an apparently legitimate, low-risk website, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage is classified as a News / Editorial page with no reported red flags, phishing indicators, or suspected brand impersonation.
- Interactive behavior recorded 26 external XHR requests, 16 external POST requests, and a maximum DOM difference of 1,103, while recording 0 hidden forms, 0 external password forms, 0 wallet-connect runs, 0 wallet-drainer runs, and 0 clipboard-write events.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit.
- The domain was registered on 2017-09-20 and is approximately 8.9 years old; historical records contain 1,940 snapshots spanning 2010–2026, covering 17 tracked years.

Regulatory Verification Notes

The site's legal notices, contact information, and commercial channels are visible, which is consistent with an operating publishing business. No regulated financial-service claim, license claim, or license number is presented; for this editorial business model, that is a disclosure and applicability point for confirmation rather than evidence of misconduct. Available evidence is consistent with an established, apparently legitimate

website, but the operator's real-world identity is not independently verified. The unmatched third-party broker context provides no additional reputational concern, although it is not a licensing determination.

EVIDENCE

- The homepage displays contact information, commercial or promotional offers, and legal notices alongside article listings.
- The site's transport encryption uses a TLS certificate issued by WE1, with DV validation, valid through 2026-10-08.
- The site's page title identifies it as "Bnews · Últimas notícias do portal mais ágil da Bahia," and the page contains substantial editorial navigation covering regional and national news categories.

What to Verify Next

Before credential or payment interactions connected with any promotional or commercial offering, an independent check should compare the operator named in the site's legal notices with applicable Brazilian corporate or media records. Any transaction should also be supported by clear merchant identity, terms, cancellation or return provisions where relevant, and payment methods offering appropriate protection. Contact channels should be confirmed through an independent, offline route before sensitive account matters are handled.

EVIDENCE

- The legal-notice and contact pages provide the primary references for checking the responsible operator and official communication routes.
- The offers and commercial sections are the relevant locations for reviewing transaction terms and payment protections.
- The newsletter and other subscription-related functions are the relevant locations for confirming what information is requested before submission.

Summary Verdict

The overall posture is **high trust and low risk**, and the evidence is consistent with an established, apparently legitimate news website. No scam, phishing, impersonation, or other contradictory signal was identified; the remaining limitation is that website trust does not independently establish the real-world operator's identity.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF infrastructure and resolves through Cloudflare edge servers associated with AS13335, operated by Cloudflare, Inc. This provides a meaningful mitigation against direct origin exposure and common network-level abuse, but protective hosting remains a security control rather than proof of business legitimacy.

EVIDENCE

- Hosting infrastructure: AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- Four observed addresses were Cloudflare edge addresses, with 0 likely origin candidates identified.

Closing Assessment

Routine editorial browsing is proportionate to the available evidence; before submitting credentials or making payments, ordinary independent checks of merchant identity, applicable terms, and payment protection should be completed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bnews.com.br.

- The request stayed on bnews.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-09-20. CLEAR
- The earliest public archive of this site is from 2010-01-15. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bnews.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
