Full analysis

Overview

The website presents itself as a Toronto-based catering business serving corporate clients and private-jet/VVIP customers in the YYZ area, with menus and service-booking information for aviation and corporate catering.

Scam/Impersonation Risk

The site's visible content is a conventional catering presentation rather than a phishing or credential-harvesting interface: the homepage describes catering services, provides menu and contact pathways, and no login or sensitive-data form was observed. However, this benign page presentation is outweighed by a **confirmed blacklist** finding and multiple external malicious or suspicious detections. No identity contradiction, brand-impersonation indicator, or page-level phishing mechanism was observed, but the external reputation conflict is sufficient to make sensitive interaction inappropriate until independently resolved.

EVIDENCE

- The homepage is categorized as a business/catering page and contains no login form, hidden form, password collection, wallet connection, or external password submission.
- External reputation evaluation recorded 3 malicious and 2 suspicious detections among 5 effective detections.
- The domain's archival record identifies first observation on 2003-06-21 and last observation on 2026-04-14, with 24 years tracked and 0 snapshots reported; coverage is therefore incomplete rather than evidence of a recently created domain.

Regulatory Verification Notes

The site identifies the business as “BRC Catering Services” and states that it is formerly “Boardroom Catering,” but the available material does not independently verify the operating entity. No license claim, licensing authority, or registration number is disclosed in the reviewed business pages. This is a regulatory and transparency verification gap, not by itself proof of fraud. The domain is long-established and registered through Tucows.com Co.; those facts support registration continuity but do not resolve the external blacklist finding or independently establish the operator’s legal identity.

EVIDENCE

- The homepage and business content describe private-jet and corporate catering in Toronto/YYZ but provide no license authority or license number.
- WHOIS records show registration on 2001-01-15 and an age of 25.61 years; the registrar is Tucows.com Co.
- The site’s page authority is recorded as low, while the page lacks a meta description and structured data.

What to Verify Next

Before any sensitive engagement, an independent party should confirm the legal business identity and any applicable food-service, aviation-catering, or corporate-registration requirements through authoritative registries. Contact details should be validated through an independently sourced business listing or offline channel, and any invoice or payment request should be checked against the verified entity and protected payment terms. The confirmed blacklist status should also be cleared by obtaining a documented explanation from the relevant reputation-maintenance channels before credentials, confidential information, or funds are involved.

EVIDENCE

- The site’s contact page and footer provide business contact information and identify “BRC Catering Services,” but the available evidence does not independently connect those claims to a verified legal entity.
- The homepage offers menus and service contact options but does not present a licensing authority or registration number.
- The business model is described as local corporate catering, with no observed sensitive transaction form or automated payment interface.

Summary Verdict

The overall posture is critical, with elevated risk for sensitive interaction. The website's apparent commercial purpose and technically stable presentation do not overcome the confirmed external reputation contradiction, and the real-world operator remains unverified.

Infrastructure Integrity

The site resolves directly to a likely origin address with no CDN detected. Its hosting is provided by Hostinger International Limited, and the available transport encryption is a mitigating technical control only; neither hosting nor TLS establishes legitimacy.

EVIDENCE

- Served from AS47583 (AS-HOSTINGER - Hostinger International Limited, CY), with the resolved server in LT.
- TLS certificate issuer: YE2; validation level: DV; valid to 2026-10-12T19:31:17+00:00, with 51 days remaining.
- Infrastructure analysis identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.

Closing Assessment

Until independent identity, authorization, and reputation checks are completed, activity should remain limited to non-sensitive viewing, with no login, credential submission, confidential-data transfer, or financial transaction through the site.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about boardroomcatering.ca at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
