Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2019.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Bodrogi Irodaház is a Hungarian-language corporate website presenting an office-building and business-incubator project for startups and companies less than three years old, with office rental and related support services as its apparent business model.

Scam/Impersonation Risk

The site's published content is consistent with a conventional local office and incubator operation: the homepage describes Bodrogi Bau Kft., an EU-supported development project, and rental opportunities for young businesses. The site does not present a login facility, payment workflow, cryptocurrency function, or other obvious abuse-oriented interaction surface, and no brand impersonation, phishing behavior, or conflicting legal identities were identified in the supplied page evidence. However, this benign presentation is outweighed by a confirmed external blacklist signal and two malicious detections associated with the domain. Those findings constitute a material contradiction to the site's otherwise ordinary corporate presentation and create elevated risk for sensitive interaction. The operator's real-world identity also remains unverified, so the website's on-page claims should not be treated as independently established.

EVIDENCE

- The homepage describes Bodrogi Irodaház as an incubator-style office facility offering favorable leases and services to newly established or less-than-three-year-old businesses.
- External reputation telemetry records `external\_blacklist: true` and two malicious detections among evaluated results.
- The homepage's transport certificate confirms TLS protection, but certificate presence does not resolve the external reputation contradiction.
- Domain registration records show registration in 2014 (~12.2 years old).

Regulatory Verification Notes

The site identifies Bodrogi Bau Kft. in its project description and states that the development received EU funding, but the supplied evidence does not independently verify the company's identity or establish a regulatory affiliation. No license, registration number, or regulatory authority is claimed on the reviewed pages; for an office-rental business this is a disclosure and verification matter rather than evidence of fraud by itself. The site's governance and ownership disclosures are therefore insufficient for a regulated counterparty's onboarding standard. The available third-party broker dataset contains no match, which is only a contextual reputational observation and not a licensing determination.

EVIDENCE

- The homepage names Bodrogi Bau Kft. as the project operator and describes the "Inkubátorház fejlesztés Csongrádon" project.
- The homepage states that the project received HUF 104,608,482 in EU support.
- The hosting infrastructure resolves through AS210579, operated by RACKHOST-AS — Rackhost Zrt., HU.
- The site uses a DV TLS certificate issued by YE1, valid to 2026-10-17.

What to Verify Next

Before any lease, service agreement, payment, or exchange of sensitive business information, an independent corporate-registry check should confirm Bodrogi Bau Kft.'s existence, current status, authority to operate the facility, and the relationship between that company and the website. The stated EU funding should be checked against an authoritative public grant record, and the physical premises and contractual counterparty should be confirmed through an independently obtained telephone number or offline business documentation. The external reputation contradiction should also be resolved through the relevant security or domain-abuse review process before sensitive digital interaction is permitted.

EVIDENCE

- The homepage supplies the company name and funding claim that require independent confirmation.
- The site's navigation identifies separate "Services" and "Contact" areas, providing the stated business and communication context for counterparty checks.
- The reviewed pages contain no login form or sensitive submission form, so there is no demonstrated need for credential submission during ordinary content review.

Summary Verdict

The overall posture is low trust and unsuitable for sensitive digital interaction at this time. The site presents a plausible corporate purpose and technically functional web presence, but the confirmed external reputation contradiction and unverified operator identity prevent the available evidence from supporting a trustworthy engagement conclusion.

Infrastructure Integrity

The site is hosted directly on infrastructure attributed to Rackhost Zrt. in Hungary; no CDN or WAF was detected, and the resolved address is assessed as a likely origin address. This provides limited protective separation between the website and its hosting environment, while infrastructure alone cannot establish legitimacy.

Closing Assessment

Restrict activity to passive review until the operator, funding claim, and external reputation contradiction have been independently resolved; credentials, financial information, and contractual commitments should not be submitted in the interim.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bodrogiirodahaz.hu at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
