Full analysis

Overview

Bom Pra Crédito is a Brazilian online credit-comparison and lead-generation platform that presents loan simulations, multiple borrowing options, and introductions to partner financial institutions. Its apparent business model is to collect borrower applications and facilitate lender referrals rather than issue credit directly.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, or malicious-reputation indicators. The homepage explicitly states that the service is free and that advance deposits are never requested, which is a relevant safeguard for a credit-intermediation service. The site's long-running domain presence, sustained archival continuity, and clean external reputation provide converging support for an established site, although they do not independently prove the real-world operator's identity.

EVIDENCE

- Domain registered 2013-07-24; age 13.06 years; the registration record names PP PROMOTORA DE VENDAS S.A.
- 267 archive snapshots spanning 2013–2026, covering 14 years tracked with a maximum observed gap of 1 year.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist or phishing finding for the domain.

Regulatory Verification Notes

The homepage describes a marketplace that collects applications and connects applicants with partner financial institutions, while stating that the platform itself does not issue credit. It lists personal, payroll-deducted, secured, salary-advance, MEI, business, FGTS, and other credit products, and presents claims such as more than R\$2 billion in credit granted, more than 12 million registered users, and more than 70 financial partners. These are substantive commercial claims rather than independently verified regulatory evidence. No license claim or license number is identified in the supplied page evidence, so the applicable status of the platform and its lending partners remains a transparency item for independent confirmation. The available evidence is consistent with an established, apparently legitimate financial-services website, but the operator's real-world identity is not independently verified.

EVIDENCE

- The homepage contains one sensitive lead-capture and loan-simulation form and identifies the business category as a lending marketplace.
- The domain's registration record lists PP PROMOTORA DE VENDAS S.A. as owner, without independently establishing that entity's operational relationship to the website.
- Hosted on AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- TLS certificate issued by Amazon RSA 2048 M04, validation level DV, valid to 2026-11-25T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the legal counterparty operating the platform and the identity of any lender presented through the application process. The relevant financial-services registry should be checked for applicable authorization of the platform or participating institutions, and the site's privacy, consent, loan-cost, and dispute-handling terms should be reviewed. Contact channels should also be confirmed through an independent route before sensitive documents or financial information are submitted.

EVIDENCE

- The homepage states that partner financial institutions provide the credit rather than the platform itself.
- The homepage provides contact information and directs visitors to a help or support function.
- The homepage presents a borrower application flow, making data-use and consent terms material to any subsequent interaction.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradiction. The assessment supports normal consideration of the site's standard functions, while remaining distinct from proof of the operator's legal identity.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure. Observed traffic resolved to edge addresses 18.229.128.174 and 54.232.169.154 on AS16509, with no origin candidate observed; this reduces direct origin exposure and is a mitigating infrastructure signal, not proof of legitimacy.

Closing Assessment

Prospective users should perform ordinary independent checks of the legal counterparty, data-use terms, and payment protections before submitting sensitive information or completing a financial transaction.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bompracredito.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
