

Is bonarenergy.com safe? TrustSniffer's low-trust assessment: 25/100

bonarenergy.com

Verdict

25

OUT OF 100

LOW TRUST

bonarenergy.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal 'Launching Soon' landing page (bonarenergy.com) with repeated site name, CTA buttons and a cookie notice. No product details, contact info, or forms present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://bonarenergy.com/>

What bonarenergy.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

bonarenergy.com is a minimal “Launching Soon” landing page presenting repeated references to the domain, “Go from idea to live site in minutes,” an offer of “50 free credits,” “Try Airo AI Builder” and “Start for free” calls to action, together with a cookie notice; it does not explain a substantive business model, product, pricing, or transaction flow.

Scam/Impersonation Risk

Confirmed external contradictions materially elevate the risk of sensitive interaction. The domain is reported as blacklisted by external sources, and eight evaluated detections classify it as malicious, with one additional suspicious detection. These signals are stronger than the site's limited presentation and support a clearly cautionary assessment. Separately, thirteen abuse reports concern an Amazon content-delivery IP shared with other sites; that attribution limits the extent to which those reports can be assigned specifically to bonarenergy.com, but it does not offset the domain-level detections. No separate brand-impersonation or conflicting-legal-identity signal was identified.

EVIDENCE

- The homepage is a “Launching Soon” placeholder with no substantive business context, contact information, or transactional explanation.
- External reputation telemetry records a confirmed blacklist hit and 8 malicious plus 1 suspicious detections for the domain.
- The shared content-delivery IP 76.223.105.230 is associated with 13 abuse reports attributed to Amazon.com, Inc. shared infrastructure.

Regulatory Verification Notes

The available page does not establish an identifiable operator, regulated activity, licensing basis, or registration number. This is a material disclosure gap for any engagement involving financial, commercial, or other sensitive activity, but the absence of a disclosed licence is treated as a verification issue rather than standalone proof of fraud. The domain is established in registration terms, while the site's transport security is provided through a standard domain-validated certificate; neither fact independently verifies the operator's identity or regulatory status.

EVIDENCE

- Domain registration: created 2019-01-24T21:45:59Z, age 7.57 years, expiring 2027-01-24T21:45:59Z; registrar: GoDaddy.com, LLC.
- The historical record is dated from 2021-11-27T01:40:09Z to 2026-01-31T07:47:48Z, with 6 years tracked.
- TLS certificate: GoDaddy TLS Intermediate CA DV - R1v1, validation level DV, valid to 2026-11-02T04:42:06+00:00.

What to Verify Next

Before any sensitive engagement, an independent registry check should confirm whether a real operator associated with the site holds the licence or registration required for its proposed activity. Any claimed business identity and support route should be confirmed through an independently sourced channel rather than relying solely on the landing page. Account creation, credential submission, payments, and other irreversible actions should remain suspended unless those checks produce consistent, independently corroborated results.

EVIDENCE

- The homepage presents calls to action without identifying a responsible legal entity or regulated service.
- No forms, product documentation, pricing, or independently linked business information were identified on the captured page.

Summary Verdict

The overall posture is **low trust with high sensitivity to interaction risk**. The site's apparent identity remains unverified, and the combination of confirmed external threat detections with a very limited business presentation does not support confidence for account, credential, or financial use.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with observed edge addresses belonging to Amazon.com, Inc.; the origin server was not observable in this analysis. This infrastructure provides a mitigating layer against direct origin exposure, but CDN protection is not evidence that the site or its operator is legitimate.

EVIDENCE

- Served from AS16509 (Amazon.com, Inc., US), with observed edge IPs 13.248.243.5 and 76.223.105.230.
- CDN/WAF status: present; observed edge IP count 2 and likely origin IP count 0.

Closing Assessment

The proportionate course is passive viewing only until independent identity, regulatory, and contact-channel checks are completed; credentials and financial information should not be submitted in the interim.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 13 reports on hosting IP 76.223.105.230 (Amazon.com, Inc., Content Delivery Network), 26% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bonarenergy.com.

- The request stayed on bonarenergy.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-24. NOTED
- The earliest public archive of this site is from 2021-11-27. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bonarenergy.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
