

Is borneo.cl legit? TrustSniffer's high-trust assessment: 100/100

borneo.cl

Verdict

100

OUT OF 100

HIGH TRUST

borneo.cl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Personal portfolio of a graphic designer and marketing professional offering branding, web design and content services. Contains biography, services, portfolio sections and a contact form with email/phone and budget selection.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

borneo.cl is a personal portfolio website for Paulina Valenzuela, presenting graphic design, branding, web design, marketing, content, portfolio, pricing, testimonials, and contact services for prospective clients.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity signals were observed. The homepage presents a coherent freelance-services model, including a professional biography, design and marketing experience, portfolio material, service offerings, and a client contact workflow rather than account-access, investment, or other abuse-oriented functionality. Available external reputation checks recorded no malicious or suspicious detections, although reputation coverage was partial. The site therefore appears consistent with an established, apparently legitimate portfolio, while the operator's real-world identity remains likely rather than independently verified.

EVIDENCE

- The homepage identifies Paulina Valenzuela and describes approximately 15 years of experience in visual communication, branding, and digital marketing.
- The homepage's service and portfolio content describes branding, web design, marketing, content, and related client-project work.
- The homepage contains one contact form requesting an email address, telephone number, budget selection, and message; no login or hidden sensitive form was detected.
- The domain was registered in 2007 and is approximately 19.44 years old; archival records contain 95 snapshots spanning 2007–2026, with 20 years tracked.

Regulatory Verification Notes

The website presents itself as a freelance creative-services practice rather than a regulated financial or investment provider. No professional license claim or registration number is identified in the reviewed page material; for this business model, that is a transparency point to clarify rather than evidence of deceptive activity. The site provides a named professional biography and links to multiple social and professional platforms, but those on-site claims do not independently prove the legal contracting party or beneficial operator. Registration through NIC Chile, a valid domain history, clean observed reputation, and stable technical presentation are evidence-consistent with an established site.

EVIDENCE

- The homepage includes About, Resume, Services, Portfolio, Pricing, Testimonial, and Contact sections.
- The domain registration record lists NIC Chile as registrar and shows an expiration date of 2027-04-12.
- The site is hosted on AS46606, Unified Layer, US.
- Transport encryption uses a DV certificate issued by YR2, valid through 2026-10-29.

What to Verify Next

Before a paid engagement, the prospective client should independently confirm the legal name of the contracting party, the intended payment recipient, and the authenticity of the professional profile through a separately obtained contact route. A written statement of work should define deliverables, milestones, cancellation or refund terms, ownership of supplied materials, and dispute handling; payment methods should provide appropriate commercial protection. Official support and contact channels should also be confirmed independently before credentials or payment information are exchanged.

EVIDENCE

- The homepage provides biographical, service, pricing, portfolio, and testimonial sections that can be compared with independently sourced professional profiles.
- The contact form collects project budget and message information but does not itself establish contractual identity, payment terms, or consumer remedies.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The site’s apparent legitimacy is supported by converging content, historical, reputation, and technical signals, but the real-world operator identity is not independently verified.

Infrastructure Integrity

The site resolves directly to Unified Layer hosting in the United States, with no CDN or WAF identified and no separate edge layer observed. This is a straightforward hosting arrangement rather than a concealment finding; the valid TLS deployment and resolved, stable hosting posture provide ordinary transport and availability assurances, but protective infrastructure should not be treated as proof of operator identity.

EVIDENCE

- Hosting infrastructure: AS46606, Unified Layer, US; one resolved IP and zero detected edge IPs.
- No CDN was detected, and one likely origin IP was identified.
- TLS validation level is DV; issuer is YR2; certificate validity ends at 2026-10-29T20:42:48+00:00.

Closing Assessment

The website is suitable for ordinary portfolio review and prospective service engagement, provided that the contracting identity, written commercial terms, and payment protections are confirmed through normal independent business checks before payment or sensitive information is exchanged.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of borneo.cl.

- The request stayed on borneo.cl. It was not redirected to another domain. CLEAR
- Registration is published under NIC Chile. CLEAR
- DNS for this domain is served by volcanica.pro, across 2 name servers. NOTED
- The registration is paid up to 2027-04-12. NOTED

- The earliest public archive of this site is from 2007-04-18. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about borneo.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
