

Is bosstodaka.com safe? TrustSniffer's low-trust assessment: 40/100

bosstodaka.com

Verdict

40

OUT OF 100

LOW TRUST

bosstodaka.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Japanese-language official website for photographer Yasuhiro Todaka. Contains portfolio, blog, gallery and sitemap links; copyright notice. No forms or transactional flows detected.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What bosstodaka.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This Japanese-language website presents itself as the official online portfolio of photographer Yasuhiro Todaka, offering visitors photography work, a blog, gallery pages, a sitemap, and copyright-protected creative content; its apparent purpose is professional exposure and commissioned photography rather than online commerce or financial services.

Scam/Impersonation Risk

A confirmed external blacklist hit creates a material contradiction to the otherwise benign presentation of the homepage and warrants a clearly cautionary assessment for sensitive interaction. The site content itself contains no detected login form, payment flow, wallet connection, or other transactional mechanism, and no page-level brand-impersonation indicators were identified; however, the external reputation signal remains decisive. The domain is also presented as a personal portfolio, while its real-world operator identity remains independently unverified, so the on-site identification should not be treated as proof of ownership.

EVIDENCE

- The homepage identifies “Yasuhiro Todaka” as a photographer and provides portfolio, blog, gallery, and sitemap navigation, with no sensitive forms detected.
- External reputation checks recorded a confirmed blacklist result, alongside additional malicious or suspicious detections.
- The domain was registered in 2007 and is approximately 19.59 years old, based on registration records.

Regulatory Verification Notes

The available site content supports a personal photography business model and does not present a financial, brokerage, or other regulated-service offering. No licensing claim or registration number is supplied in the reviewed content; for this type of portfolio site, that is a transparency and identity-verification gap rather than independent proof of wrongdoing. The website’s stated identity is therefore best described as apparent rather than independently verified. Its transport and hosting indicators are technically established, but they do not establish the operator’s legal identity or legitimacy.

EVIDENCE

- The homepage title and body text identify the site as the official website of photographer Yasuhiro Todaka and display a copyright notice.
- The site’s TLS certificate is issued by YR1, uses Domain Validation (DV), and is valid to 2026-10-06.
- The site is hosted on AS131965 through XSERVER - Xserver Inc., JP.

What to Verify Next

Before any non-routine engagement, an independent offline or otherwise trusted channel should confirm that the person or business associated with the portfolio controls the domain. Any proposed commission, invoice, deposit, or transfer should be matched against independently obtained contact and payment details, and any applicable business or professional registration should be checked with the relevant authority rather than relying solely on site content.

EVIDENCE

- The homepage provides the claimed photographer identity and links to the site’s public content areas, which can be compared with independently sourced professional references.
- The site presents a portfolio and blog model rather than an on-site transactional workflow, so any payment request received through a separate channel should be validated independently.
- The supplied content does not include a licensing or registration identifier for independent confirmation.

Summary Verdict

The overall posture is low trust because a confirmed external blacklist signal materially outweighs the site’s benign portfolio presentation and valid technical configuration. The website may be a genuine personal photography portfolio, but the available evidence does not support treating it as sufficiently trusted for sensitive interactions.

Infrastructure Integrity

The site resolves directly to a single identified origin candidate, with no detected CDN or edge-IP layer. This configuration is technically straightforward but provides no CDN-derived mitigation; infrastructure characteristics should therefore be treated only as neutral technical context, not as evidence of legitimacy.

Closing Assessment

Activity should remain limited to passive viewing until the operator’s identity and the authenticity of any proposed engagement have been independently established; account, credential, and financial interactions warrant heightened restraint.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bosstodaka.com.

- The request stayed on bosstodaka.com. It was not redirected to another domain. CLEAR
- Registration is published under XServer, Inc.. CLEAR
- DNS for this domain is served by xserver.jp, across 5 name servers. NOTED
- The registration is paid up to 2027-01-21. NOTED
- The earliest public archive of this site is from 2010-03-16. CLEAR
- It is hosted on XSERVER, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bosstodaka.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
