Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Boursenews.ma is a Moroccan financial news and market-information portal presenting equity news, banking and macroeconomic coverage, corporate disclosures, technical analysis, investor education, market tools, and related video content for an audience seeking financial information and commentary.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent editorial business model rather than a deposit-for-return scheme, and the reviewed interaction surface showed no login form, sensitive-data collection, phishing behavior, wallet activity, or brand impersonation. External reputation checks were clean, supporting the conclusion that the site is legitimate rather than an impersonation or scam operation.

- The homepage identifies financial journalism, market analysis, investor education, and media content as its principal functions.
- The homepage contained no sensitive forms, hidden forms, or credential-harvesting destination.
- The domain was registered in 2016 and is approximately 10.5 years old.
- Archive records contain 5,000 snapshots spanning 2015–2022, covering 8 tracked years.

Regulatory Verification Notes

The site's apparent role is informational financial media, not a directly regulated deposit-taking or investment-execution service. No license claim, licensing authority, or registration number was identified in the reviewed site content; this is a limited disclosure point requiring contextual verification only if the business offers regulated services beyond publishing. No adverse broker-reputation match was recorded, which is contextual support rather than a legal or regulatory determination.

- The homepage and navigation present editorial sections, investor tools, market commentary, and video programming.
- Registration telemetry identifies ARCANES TECHNOLOGIES as registrar, with creation dated 2016-02-03 and expiry dated 2027-02-03.
- Hosting telemetry records AS13335, operated by CLOUDFLARENET - Cloudflare, Inc., US.
- The TLS certificate is issued by WE1 at DV validation level and is valid through 2026-09-15.

What to Verify Next

If any future offering involves regulated advice, execution, custody, or solicitation of funds, the relevant authorization should be confirmed directly with the applicable Moroccan registry. For commercial engagement, the contracting entity and official communication channels should be confirmed through an independently sourced route.

- The homepage provides an editorial and market-information presentation rather than a stated regulated-service offering.
- The site's investor-facing sections should be reviewed again if their functionality or commercial scope changes.
- Any terms, disclosure, or partnership materials associated with a new service should be checked against the applicable regulatory requirements.

Summary Verdict

Boursenews.ma presents as a legitimate, established, and trustworthy financial-information website with a coherent purpose, sustained historical presence, clean observed behavior, and no identified impersonation or fraud contradictions. Normal interaction, including account login where offered and standard site use, is appropriate.

Infrastructure Integrity

The site is protected by a Cloudflare CDN/WAF, and the observed addresses function as CDN edge endpoints rather than exposed origin infrastructure. This reduces direct origin exposure and provides a meaningful defensive layer, although protective infrastructure is mitigating evidence rather than proof of legitimacy.

Closing Assessment

Routine browsing and standard interaction are appropriate, with ordinary institutional controls applied if the site later introduces services involving regulated financial activity.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of boursenews.ma.

- The request stayed on boursenews.ma. It was not redirected to another domain. CLEAR
- Registration is published under ARCANES TECHNOLOGIES. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-03. NOTED
- The earliest public archive of this site is from 2015-04-23. CLEAR

- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about boursenews.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
