What bouyguestelecom.fr served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Bouygues Telecom is a French telecommunications corporate-commerce website presenting mobile plans, Bbox fibre and internet services, smartphones and other devices, promotions, financing options, customer support, and account-management functions.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent telecommunications retail model, with no detected phishing, malware, brand-impersonation, or other fraud indicators. Some external requests and posts were not allowlisted during behavioral observation, but the same examination found no cloaking, hidden forms, external password forms, wallet activity, clipboard manipulation, or other abuse pattern; this is therefore treated as an implementation signal rather than evidence of impersonation. The site also has an established global traffic footprint and clean external reputation results. The apparent legitimacy is strong, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage provides a consistent corporate/ecommerce presentation for Bouygues Telecom, with no page-level red flags or detected brand-impersonation indicators.
- Domain registration telemetry records 1996-10-20 as the creation date, with an age of approximately 29.84 years.
- External reputation checks recorded 0 malicious detections and 0 suspicious detections; the site's traffic rank was 16436 and it was within the top 1 million globally.
- Behavioral observation found no hidden forms, password submissions to external destinations, cloaking, wallet-provider activity, wallet-drainer activity, or clipboard hijacking.

Regulatory Verification Notes

The site provides legal, privacy, cookie, support, and commercial information appropriate to a consumer telecommunications service. The supplied evidence does not independently verify the operating entity or establish a regulatory licence record; this is a verification item concerning disclosure and commercial status, not evidence of a scam. The site's established registration history, recognised certificate issuer, identified infrastructure, and coherent commercial content support an evidence-consistent view of an established website. The certificate subject organisation is a concrete technical attribute, but it does not by itself prove the real-world operator identity.

EVIDENCE

- Registration records identify NAMESHIELD as registrar; the domain was created on 1996-10-20 and is scheduled to expire on 2027-08-03.
- Server telemetry identifies AS16625, operated by Akamai Technologies, Inc.; the infrastructure record separately identifies AS5410, BOUYGTEL-ISP, operated by Bouygues Telecom SA in France.
- The site's TLS certificate was issued by GeoTrust TLS RSA CA G1, uses OV validation, identifies BOUYGUES TELECOM SA as the subject organisation, and is valid until 2027-02-05 23:59:59 UTC.
- The homepage and linked site content expose legal, privacy, cookie, customer-support, and commercial-policy information.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the legal entity operating the service through the relevant French corporate and telecommunications sources. The terms should be reviewed for cancellation, delivery, returns, financing, and consumer-support provisions, and payment should be completed only through the stated protected payment process. Official support and contact channels should also be confirmed through an independent route, such as a recognised corporate social profile or published customer-service channel.

EVIDENCE

- The site links to customer assistance, account management, and commercial offer areas from the homepage.
- The page structure includes customer reviews and legal, privacy, and cookie information relevant to consumer due diligence.
- The site links to recognised app-store destinations and PayPal within its broader service and payment ecosystem.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam or impersonation contradiction was identified. The classification supports ordinary site interaction, but the operator's real-world identity should be regarded as likely rather than independently proven.

Infrastructure Integrity

The site resolves to infrastructure associated with Bouygues Telecom SA in France, with a single resolved address and no detected CDN or WAF edge layer; the address is assessed as a likely origin rather than an edge address. Separate server telemetry identifies Akamai Technologies, Inc. This infrastructure posture is technically coherent and provides useful attribution context, but hosting arrangements alone are not proof of legitimacy.

Correction: the hosting record for this site names AKAMAI-AS, a content delivery network that TrustSniffer now recognises. The statement above that no CDN edge was detected was written before that recognition and does not reflect it. A new analysis restates it from the corrected infrastructure check.

Closing Assessment

Ordinary use is proportionate to the current assessment; independent merchant-identity, contractual, return-policy, and payment-protection checks should be completed before credentials or payment details are submitted.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bouyguestelecom.fr.

- The request stayed on bouyguestelecom.fr. It was not redirected to another domain. CLEAR
- Registration is published under NAMESHIELD. CLEAR
- DNS for this domain is served by bouyguesbox.fr, across 5 name servers. NOTED
- The registration is paid up to 2027-08-03. NOTED
- It is hosted on AKAMAI-AS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bouyguestelecom.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
