

Is bozkimya.com a scam? TrustSniffer's high-risk assessment: 0/100

bozkimya.com

Verdict

0

OUT OF 100

CRITICAL RISK

bozkimya.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 75%.

What this site appears to be

Corporate website for Boz Kimya, a chemical products supplier. Contains product listings, contact details (phone, email), physical address in Lüleburgaz/Kırklareli, and navigation for company/about/gallery. No login or payment forms visible.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What bozkimya.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Boz Kimya is a corporate B2B chemical manufacturer and distributor presenting chemical product categories, company information, a gallery, and contact channels for commercial enquiries and orders. Its apparent business model is the sale and distribution of industrial, cleaning, water-treatment, paper, and related chemical products.

Scam/Impersonation Risk

Confirmed external blacklist signals create a serious risk for sensitive interaction with the site. Multiple external detections identify the domain as malicious, including a detection by Kaspersky, and the site is subject to confirmed blacklisting. These findings conflict with the otherwise ordinary corporate presentation; however, no separate identity inconsistency or brand-impersonation finding is recorded. The site's long registration history and continuous archival presence provide provenance context but do not neutralize the current external threat intelligence. No login or payment form was observed on the captured pages, limiting the directly visible interaction surface but not resolving the reputation concern.

EVIDENCE

- External reputation assessment: 4 malicious detections were recorded from 9 effective detections, with Kaspersky among the flagged providers; confirmed blacklist status was also recorded.
- Domain registration record: created 2015-08-13T13:00:21Z; age 11.02 years; expiration 2027-08-13T13:00:21Z.
- Web archive: 527 snapshots spanning 2016–2026, covering 11 tracked years with a maximum gap of 1 year.

Regulatory Verification Notes

The website presents itself as Boz Kimya and describes a B2B chemical-supply business, but the real-world operator remains independently unverified. The available pages do not state a license claim, licensing authority, or license number; for a chemical transaction, this is a material disclosure point that requires independent confirmation rather than being treated as evidence of fraud by itself. The product presentation covers paper and board chemicals, water-treatment chemicals, the Bozclean Special 5000 heavy soil and oil remover, and disinfectants and surface-cleaning agents. Those products imply a need for appropriate commercial, safety, and sector documentation before procurement. The absence of a broker-dataset match does not constitute a legal or regulatory determination.

EVIDENCE

- Registrar record: IHS Telekom, Inc.
- Hosting telemetry: served from AS49126, IHS Kurumsal Teknoloji Hizmetleri A.S., Türkiye.
- Transport encryption: TLS certificate issued by YR1 at DV validation level, valid to 2026-10-27T08:39:08+00:00.
- Homepage and product navigation: lists paper and board chemicals, water-treatment chemicals, Bozclean Special 5000, and disinfectants and surface-cleaning agents.

What to Verify Next

Before any commercial commitment, the proposed counterparty should be matched to an independent Turkish commercial registry record and to any sector-specific permits required for the intended chemical products. The stated business address and telephone channel should be confirmed through an independently obtained source, and procurement should require independently validated safety data sheets, specifications, invoices, and delivery terms. Any payment should use contractual protections and a payment method offering recourse.

EVIDENCE

- About/company pages: use the stated corporate identity as the basis for an independent registry and counterparty check.
- Contact page: independently confirm the physical address and telephone details before placing an order.
- Product pages: request and validate product-specific safety and technical documentation before purchase or use.

Summary Verdict

The overall posture is **critical trust with sensitive-interaction risk**. The external threat detections and confirmed blacklist status outweigh the site's conventional corporate appearance and historical continuity. The operator's real-world identity is not independently verified, so the site should not be treated as an established or cleared commercial counterparty.

Infrastructure Integrity

The site resolves directly to a single likely origin address, 185.216.113.132, hosted in Türkiye by IHS Kurumsal Teknoloji Hizmetleri A.S. on AS49126. No CDN or WAF was detected, so there is no identified edge-protection layer to mitigate direct hosting exposure; infrastructure characteristics cannot offset the external reputation findings.

Closing Assessment

Engagement should remain limited until the counterparty, required documentation, and transaction protections have been independently validated; credentials and financial commitments should not be submitted while the external threat status remains unresolved.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bozkimya.com.

- The request stayed on bozkimya.com. It was not redirected to another domain. CLEAR
- Registration is published under IHS Telekom, Inc. CLEAR

- DNS for this domain is served by ihsdnsx57.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-13. NOTED
- The earliest public archive of this site is from 2016-01-25. CLEAR
- It is hosted on AS49126, from a server in TR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bozkimya.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
