Full analysis

Overview

BPH Entertainment is a local event-services website presenting photobooth rentals, interactive Gelly Ball gaming, roaming photography, custom backdrops, galleries, and event-booking options for weddings, corporate events, birthdays, and other occasions.

Scam/Impersonation Risk

No contradictions were observed. The homepage and service pages describe a coherent, conventional event-entertainment business model based on bookings and service fees, with no detected phishing, impersonation, malicious-content, or deceptive-behavior indicators. The site also provides a contact route, client sign-in access, event galleries, and links to Facebook, LinkedIn, and Instagram, supporting an evidence-consistent interpretation of an established local commercial site. The operator identity remains apparently legitimate rather than independently verified.

EVIDENCE

- The homepage presents BPH Entertainment as an event-services provider and directs visitors toward service information, bookings, galleries, and contact.
- The contact and client-access areas are present, while behavioral testing found no login form, hidden sensitive form, wallet connection, clipboard manipulation, or suspicious script activity.
- Domain registration: 2010-08-11; age 16.03 years; registrar GoDaddy.com, LLC.
- Web archive: 345 snapshots spanning 2011–2026, covering 16 tracked years.

Regulatory Verification Notes

The reviewed pages provide basic business information and service descriptions but do not present a licensing number or regulatory authorization. For an event-entertainment vendor, that is a disclosure and verification matter rather than evidence of a scam or identity contradiction. No matching broker-reputation record was identified, and the available external reputation signals contained no malicious or suspicious detections, although reputation coverage was not comprehensive. The site's legal identity should therefore be treated as likely and apparently consistent, not proven.

EVIDENCE

- The homepage identifies the business as BPH Entertainment and provides the telephone contact 866-433-5527.
- The privacy-policy, contact, and service-navigation paths are present; the reviewed content contains no stated license number or regulatory authority.
- Hosting: AS31898, ORACLE-BMC-31898 – Oracle Corporation, US.
- Transport encryption: TLS certificate issued by YR1, validation level DV, valid until 2026-10-30.

What to Verify Next

Before credential or payment interactions, an enterprise or customer should independently confirm the merchant identity, booking terms, cancellation and return arrangements, and the payment-protection options applicable to the transaction. Contact details and social profiles should be cross-checked through an independent route, and any jurisdiction-specific requirements for event services should be confirmed with the relevant local authority where material.

EVIDENCE

- The homepage and contact page make booking and direct contact the primary calls to action.
- The privacy-policy and client-sign-in links are available from the site navigation.
- The site links to Facebook, LinkedIn, and Instagram for independent channel cross-checking.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website operating at a low-risk posture. The business presentation, sustained domain history, clean observed technical behavior, and absence of contradiction signals support normal consideration of the site, while the real-world operator identity remains not independently verified.

Infrastructure Integrity

The site resolves to a single observed IP with no detected CDN or WAF edge layer and is hosted by Oracle Corporation in the United States on AS31898. The valid domain-validated TLS certificate provides transport protection, while the hosting arrangement is a mitigating technical signal only and does not independently establish the operator’s identity.

Closing Assessment

Ordinary engagement may proceed on a proportionate basis, with independent merchant, contractual, and payment-protection checks completed before submitting credentials or authorizing payment.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bphentertainment.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
