BRACHIAL PLEXUS INTERNATIONAL

What brachialplexusinternationalschool.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Brachial Plexus International School (BPIS) is an informational medical-education website presenting a specialized, hands-on surgical training program in brachial plexus diagnosis and treatment, delivered across international venues and apparently funded through course participation and registration.

Scam/Impersonation Risk

No blacklist, phishing, malware, or brand-impersonation contradictions were observed. The site's informational presentation, stable browsing behavior, absence of login or sensitive-input forms, and lack of external transactional activity are consistent with a conventional educational website rather than an abuse-oriented service. One abuse report is associated with the observed IP address, but it concerns shared OVH data-centre infrastructure, carries zero confidence, and is explicitly discounted because it cannot be attributed to this website; it is therefore a limited infrastructure-reputation signal, not evidence of site-level misconduct.

EVIDENCE

- The homepage identifies BPIS and describes its medical training purpose, with no detected phishing or impersonation indicators.
- Behavioral testing recorded two successful runs, no external posts or fetches, no hidden forms, and no wallet or credential-collection activity.
- The observed IP, 188.165.245.164, has 1 abuse report with confidence score 0; the report is attributed to shared infrastructure rather than the site.

Regulatory Verification Notes

The available content describes a professional medical-training service and provides a clear program purpose, but it does not state a licensing or registration number or identify a responsible regulatory authority. That omission is a verification and disclosure gap rather than evidence of a scam. The real-world operator identity remains independently unverified, so the site's apparent legitimacy should not be treated as proof of the legal entity behind the program. The domain is long-established, registered through PDR Ltd. d/b/a PublicDomainRegistry.com, and has continuous historical presence; its transport security is also technically valid. No matching broker-reputation record was identified.

EVIDENCE

- Domain registration: 2018-09-21T13:34:29Z; age 7.92 years; registrar PDR Ltd. d/b/a PublicDomainRegistry.com.
- Archive coverage spans 2019-07-22T09:33:51Z through 2025-12-14T01:44:36Z, with 7 years tracked.
- Hosting telemetry identifies AS16276, OVH - OVH SAS, FR.
- TLS uses issuer YR1 with DV validation and is valid to 2026-10-08T21:01:37+00:00.

What to Verify Next

Before committing significant funds or relying on the training for professional purposes, the program's legal operator, course-payment recipient, instructor credentials, venue relationships, cancellation terms, and any claimed educational or professional recognition should be confirmed independently. Licensing or registration status should be checked with the relevant authority in the jurisdiction governing the course or provider, and official contact channels should be confirmed through an independent route before sensitive exchanges.

EVIDENCE

- The program overview supplies the stated educational purpose and course information needed for venue and instructor verification.
- The site's contact and registration pathways are the appropriate sources to reconcile payment, refund, and contracting details with independently obtained information.

Summary Verdict

The website has a **moderate-trust, apparently legitimate posture** with no observed scam or impersonation contradiction. Its substantive educational content and consistent technical and historical signals support ordinary

informational use, while the absence of independently verified operator identity limits confidence for consequential engagements.

Infrastructure Integrity

The site is protected by a CDN/WAF arrangement, with the observed edge address associated with AS16276 and OVH - OVH SAS, FR; no origin-server candidate was identified. This edge-based architecture is a mitigating security measure that reduces direct origin exposure, but it does not independently establish the operator's legitimacy.

Closing Assessment

Routine informational browsing is proportionate, while high-value payments, professional reliance, or submission of sensitive information should follow independent confirmation of the provider and transaction terms.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 188.165.245.164 (OVH SAS, Data Center/Web Hosting/Transit), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of brachialplexusinternationalschool.com.

- The request stayed on brachialplexusinternationalschool.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by entorndns.com, across 4 name servers. NOTED
- The registration is paid up to 2026-09-21. NOTED
- The earliest public archive of this site is from 2019-07-22. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about brachialplexusinternationalschool.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
