## The page as captured

<https://brados.eu/>

What brados.eu served when TrustSniffer captured it on 2026-08-21. The page may look different now.

## Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

brados.eu is a catalog-style ecommerce website for Brados cross-country ski and skating equipment. It presents product ranges, model identifiers, dealer-location guidance, and a contact form, with an apparent business model based on product sales or referrals to purchasing outlets.

### Scam/Impersonation Risk

No contradictions were observed across the available pages and technical checks. The homepage and product catalogue are consistent with a specialist sporting-goods business, listing identifiable equipment categories and SKUs rather than presenting phishing, cryptocurrency, investment, or other high-risk financial functionality. The captured site has no login form, hidden sensitive form, wallet connection, or suspected brand-impersonation indicator. Available external checks recorded no malicious detections, blacklist hit, or abuse reports, although reputation coverage was partial. Historical evidence is consistent with continuity rather than suspicious repurposing. Evidence:

- The homepage presents Brados XC ski equipment, product listings, SKUs, and "Where to Buy" dealer guidance.
- The captured contact page contains a standard inquiry form and no credential or payment fields.

- Domain age is 3.52 years, with registration-continuity evidence; archival observations comprise 19 snapshots spanning 2023–2026, covering 4 years.

### **Regulatory Verification Notes**

The site appears to operate as a consumer sporting-equipment catalogue rather than a financial or otherwise regulated service. Its contact information gives an address in Tallinn, Estonia, and its terms section describes processing of names, telephone numbers, email addresses, and customer-support data. The available pages do not present an independently verifiable legal-entity name, registration number, or sector licence; this is a transparency item for ordinary merchant due diligence, not evidence of scam activity. The real-world operator remains unverified, so the site's apparent legitimacy should not be treated as proof of operator identity.

Evidence:

- The contact section displays “Purje tn 8, Tallinn, Estonia.”
- The terms and contact content describe customer-data processing and consent to terms.
- The domain registrar is Zone Media OÜ.
- The site is served on AS57724, DDOS-GUARD - DDOS-GUARD LTD, RU; its TLS certificate is issued by YR1 at DV validation level and is valid to 2026-10-04.

### **What to Verify Next**

Before credential or payment interactions, an independent check should connect the Brados trading name to a legally identifiable merchant, confirm the dealer or purchasing outlet independently, and review applicable returns, warranty, delivery, and payment-protection terms. The displayed contact route should also be confirmed through an independent business source rather than relying solely on the website. Evidence:

- The product pages provide model names and SKUs that can be matched against the proposed dealer's catalogue or commercial documentation.
- The contact page directs prospective customers to dealers, making independent confirmation of the purchasing outlet a relevant control.
- The terms section identifies the categories of personal data collected, supporting review of privacy and consent wording before submitting an inquiry.

### **Summary Verdict**

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture with no observed scam or impersonation contradiction. The principal limitation is that the real-world operator has not been independently verified, so legitimacy is apparent rather than proven.

### **Infrastructure Integrity**

The site resolves to a single identified hosting address associated with DDOS-GUARD - DDOS-GUARD LTD in Russia and AS57724, without a detected CDN or WAF edge layer. This provides a clear infrastructure attribution but limited additional protective separation; infrastructure characteristics are mitigating or contextual signals only and do not independently establish legitimacy.

### **Closing Assessment**

Normal browsing and catalogue use are proportionate; before submitting credentials or making payments, ordinary independent checks of merchant identity, returns, and payment protection should be completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of brados.eu.

- The request stayed on brados.eu. It was not redirected to another domain. CLEAR
- Registration is published under Zone Media OÜ. CLEAR
- DNS for this domain is served by eu for more info.. NOTED
- The earliest public archive of this site is from 2023-02-13. CLEAR
- It is hosted on DDOS-GUARD, from a server in RU. NOTED

## About this assessment

---

A trust score summarises the evidence TrustSniffer could collect about brados.eu at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
