

Is braindness.com safe? TrustSniffer's moderate-trust assessment: 65/100

braindness.com

Verdict

65

OUT OF 100

MODERATE TRUST

braindness.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Italian-language marketing landing page for 'TotalAI' offering a free 2-minute ROI calculator and downloadable report to determine the cost of not using AI. Purpose is lead capture and selling consulting/services or premium reports; no forms or payment flows visible in the provided DOM.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Avviso Urgente per Imprenditori e Manager

What braindness.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2021.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

braindness.com is an Italian-language marketing landing page presenting “TotalAI,” a free two-minute AI return-on-investment calculator and downloadable report intended to capture business leads for AI consulting, paid reports, or related services.

Scam/Impersonation Risk

No blacklist, phishing, malicious-site, or brand-impersonation contradiction was observed. The reviewed homepage contains no login form, password collection, hidden form, wallet connection, payment flow, or external submission activity, and its content is promotional rather than deceptive on the available evidence. A reputational signal is associated with the shared Google-hosted IP address, but the attribution applies to shared infrastructure rather than specifically to braindness.com; it therefore warrants contextual awareness without establishing malicious conduct. Historical evidence also shows continuity without detected repurposing or semantic drift.

EVIDENCE

- The homepage is classified as a landing/lead-generation page and contains no sensitive form or untrusted form destination.
- Behavioral testing recorded 0 external XHR/fetch requests, 0 hidden forms, 0 password submissions, and 0 wallet-provider or wallet-drainer activity across 2 successful runs.
- The shared hosting IP has 67 abuse reports and a confidence score of 38; the record identifies Google Cloud shared infrastructure as the subject.
- Archive records show the domain first observed on 2021-11-26 and last observed on 2025-12-12, with a reconciled domain age of 4.6735 years and no detected repurpose.

Regulatory Verification Notes

The site presents a conventional AI advisory and diagnostic business model, but the reviewed content does not identify an independently verified operating entity, applicable licensing position, or registration number. The homepage advertises outcome-oriented figures including “80%” operating-cost reduction, “15h” saved per week, “85%” AI-token optimisation, and “100%” data safety; these should be treated as marketing claims requiring substantiation rather than as assured results. The available evidence supports a moderate, apparently ordinary commercial profile, while legal-entity and claim-verification coverage remains incomplete. Transport security and mainstream cloud hosting are positive technical conditions, but neither proves the operator’s identity or regulatory status.

EVIDENCE

- The homepage identifies “TotalAI” and offers a free diagnostic and downloadable report, but no license or registration number is displayed in the reviewed content.
- The site is served from AS396982, Google Cloud Platform, Google LLC, United States; the current registrar is Name.com, Inc.
- The site uses a valid DV TLS certificate issued by YE1, valid to 2026-10-16.

What to Verify Next

Before a sensitive or high-value commercial engagement, independently confirm the legal entity operating TotalAI, any sector-specific obligations applicable to its consulting or data-processing activities, and the contractual terms governing reports, consultations, refunds, and data retention. Marketing performance figures should be supported by a clear methodology, defined assumptions, and evidence relevant to the prospective customer’s business. Official contact and support channels should also be confirmed through an independently sourced route before confidential business information is provided.

EVIDENCE

- The homepage describes a two-minute diagnostic based on “AI 2026” models but does not provide the calculation methodology in the reviewed content.
- The reviewed DOM contains 3,406 characters of visible text and no internal or external links, limiting the available route to supporting legal and commercial documentation.
- The page is presented in Italian, so any engagement should establish the governing language and jurisdiction for contractual documentation.

Summary Verdict

The website has a **moderate trust posture**: its observed presentation and behavior are consistent with a standard AI lead-generation service, and no scam or impersonation contradictions were identified. The real-world operator remains unverified, so the site should be regarded as apparently legitimate but not independently authenticated.

Infrastructure Integrity

The site resolves to a single Google Cloud-hosted origin without a detected CDN layer. This is ordinary hosting infrastructure and provides a technically stable delivery environment, but it is only a mitigating security condition and is not evidence of operator legitimacy.

Closing Assessment

Initial informational review is proportionate, while sensitive data, binding commitments, and high-value payments should follow independent identity, legal-status, contractual, and claims verification.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

Signals weighed against the site

- AbuseIPDB: 67 reports on hosting IP 34.111.179.208 (Google LLC, Content Delivery Network), 38% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of braindness.com.

- The request stayed on braindness.com. It was not redirected to another domain. CLEAR
- Registration is published under Name.com, Inc.. CLEAR
- DNS for this domain is served by name.com, across 4 name servers. NOTED
- The registration is paid up to 2026-10-04. NOTED
- The earliest public archive of this site is from 2021-11-26. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about braindness.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
