

Is brandaonet.com.br legit? TrustSniffer's high-trust assessment: 100/100

brandaonet.com.br

Verdict

100

OUT OF 100

HIGH TRUST

brandaonet.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 55%.

What this site appears to be

Portuguese-language website for BrandãoNET, a regional fiber-internet provider advertising residential plans from 70 to 500 Mbps, subscriber billing access, technical support, business services, social-media links, and plan purchasing through WhatsApp.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is BrandãoNET's Portuguese-language service portal for residential and business fiber connectivity, presenting fixed-price plans from 70 to 500 Mbps, subscriber billing access, technical support, and service ordering through WhatsApp.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or deceptive transaction mechanics were observed. The site's ordinary telecommunications offering, consistent BrandãoNET identity, long-established domain, stable browsing behavior, and clean external reputation converge strongly in support of legitimacy. No sensitive, hidden, or externally directed forms were detected on the assessed homepage.

- The homepage consistently identifies BrandãoNET and describes fiber subscriptions, billing access, repairs, and sales without conflicting brand or legal identities.
- The domain was registered in 2011 and is approximately 15.42 years old; the registered owner is BRANDAONET SERVICOS DE TELECOMUNICACOES LDTA.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no safe-browsing warning, and 0 abuse reports for the serving address.
- Homepage behavior showed no cloaking, hidden forms, suspicious inline scripts, clipboard manipulation, or credential forwarding.

Regulatory Verification Notes

The assessed homepage does not present a license, authorization number, or issuing authority, leaving the site's telecommunications authorization status unclear from the supplied page content. This is a minor disclosure matter rather than evidence of impersonation or misconduct. The published business identity aligns with the registered domain owner and hosting organization, while no adverse broker-related match was identified.

- The homepage's service descriptions contain no stated regulatory authority, license number, or registration reference.
- Domain registration records name BRANDAONET SERVICOS DE TELECOMUNICACOES LDTA as the owner, with registration currently extending to 2032-03-02.
- The site is served from AS273451, operated by BRANDAONET SERVICOS DE TELECOMUNICACOES LDTA in Brazil.
- Transport encryption uses a DV certificate issued by YE1, valid until 2026-10-25.

What to Verify Next

For procurement, vendor onboarding, or regulated third-party-risk review, the legal name and applicable telecommunications authorization should be confirmed against the relevant official registry. Contracting parties should also validate plan availability, billing terms, service coverage, and official support channels using the provider’s contractual documentation.

- The homepage advertises free installation, free Wi-Fi, unlimited service, and monthly pricing, making the applicable contractual conditions relevant to customer due diligence.
- Subscriber functions include access to duplicate billing documents and repair support, indicating that operational and billing-channel controls should be covered during enterprise onboarding.
- The site separately presents residential and business services, supporting confirmation that the proposed contract and service-level terms match the intended customer category.

Summary Verdict

The website is a legitimate, established, and trustworthy regional internet-service presence. Its identity, commercial purpose, technical behavior, registration history, and external reputation are mutually consistent, with no observed contradiction that undermines normal use. Account login and standard interaction are appropriate.

Infrastructure Integrity

The site resolves directly to provider-operated Brazilian infrastructure without a CDN or WAF intermediary; two likely origin addresses are visible. Direct origin exposure is consistent with self-operated ISP hosting, and the identified network ownership aligns with the site’s business identity, although this architecture provides less edge-layer shielding than a mainstream protective network.

Closing Assessment

Prospective customers may use the website normally, while institutional onboarding should follow routine supplier, contract, and registry validation procedures.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of brandaonet.com.br.

- The request stayed on brandaonet.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns.br, across 2 name servers. NOTED
- The registration is paid up to 2032-03-02. CLEAR
- It is hosted on AS273451, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about brandaonet.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
