Full analysis

Overview

Brand Buddys is a Hyderabad-based digital marketing agency serving clinics, restaurants, and small businesses through brand strategy, web design, SEO, content, social media, and healthcare-marketing services. The site presents case studies, testimonials, blog content, contact options, and service pricing beginning at ₹20,000 per month, indicating a conventional agency model based on proposals, project fees, and retained services.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there are no reported phishing, impersonation, malicious-content, or blacklist indicators, and the site does not present credential-harvesting, cryptocurrency, investment, or other abuse-oriented mechanics. The captured pages contain no login or payment-collection flow, and the agency presentation is coherent with the stated commercial purpose. This supports an apparently legitimate, low-risk website assessment, while not independently proving the real-world operator's identity.

EVIDENCE

- Homepage: presents a digital marketing agency for clinics and restaurants, with service descriptions, case-study content, and a proposal-oriented customer journey.
- Captured page behavior: no login form, hidden sensitive form, password-external form, wallet connection, clipboard hijacking, or credential-collection mechanism was detected.
- External reputation checks: zero malicious findings, zero suspicious findings, no Google Safe Browsing malicious flag, and no external blacklist match were recorded.
- Domain registration: registered 2019-06-17T07:58:27Z; age 7.18 years.

Regulatory Verification Notes

Brand Buddys identifies itself as a commercial marketing agency rather than a regulated financial or investment service. The supplied pages expose About, Company, Our Team, Contact, Services, Work, Pricing, and Blog areas, but the available evidence does not independently verify the legal entity operating under the Brand Buddys name. No regulated status or license is evidenced in the supplied content; for this type of agency, that is a business-verification point rather than an indication of impersonation or fraud. The absence of a broker-dataset match is only contextual reputational information and is not a licensing determination.

EVIDENCE

- Site navigation: includes About, Company, Our Team, Contact, Services, Work, Pricing, and Blog areas relevant to commercial identity and service disclosure.
- Domain registration record: registrar listed as HOSTINGER operations, UAB; expiration recorded as 2027-06-17T07:58:27Z.
- Transport encryption: TLS certificate issued by YE1, validation level DV, valid to 2026-10-20T13:39:11+00:00.
- Page content: describes monthly service pricing, case studies, testimonials, and contact channels, with no regulated-financial offering identified.

What to Verify Next

Before a commercial engagement, the prospective client should independently confirm the contracting entity and its authority to issue invoices, obtain written scope and deliverables from the proposal or contract, and review cancellation, refund, and payment-protection terms. Any applicable business-registration or tax details should be checked through the relevant official registry, and contact channels should be confirmed through an independent route before sensitive or payment-related exchanges.

EVIDENCE

- Pricing and proposal pages: use the stated service-plan information as the basis for reconciling scope, fees, billing frequency, and cancellation terms.
- Contact page: independently confirm the engagement contact and contracting details before sending business or payment information.
- About, Company, and Team pages: reconcile the represented business identity with the name appearing on contracts, invoices, and payment instructions.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated agency purpose. The real-world operator identity remains unverified, so the positive assessment should not be treated as proof of legal ownership or identity.

Infrastructure Integrity

The site is hosted by Hostinger International Limited through a resolved Hostinger infrastructure posture, without a detected CDN or WAF layer. This is a conventional hosting arrangement and a mitigating technical signal, but hosting infrastructure alone does not establish legitimacy.

EVIDENCE

- Hosting infrastructure: served from AS47583 (AS-HOSTINGER - Hostinger International Limited, CY), with country recorded as LT.
- Resolved network posture: two unique IP addresses were identified, with no CDN vendor detected and origin candidates present.
- TLS configuration: DV certificate issued by YE1 and valid through 2026-10-20T13:39:11+00:00.

Closing Assessment

Ordinary browsing and prospective business evaluation are proportionate to the assessed posture; credential or payment interactions should proceed only after the contracting identity, commercial terms, and payment protections have been independently confirmed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about brandbuddys.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
