## Full analysis

---

### Overview

BRANDSHOP is a Russian online fashion retailer presenting branded clothing, footwear, accessories, books, watches, and cosmetics through an ecommerce storefront supported by physical Moscow retail locations, with revenue generated from direct consumer product sales.

### Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent retail business model with product categories, ruble pricing, delivery and returns information, customer support channels, social profiles, and physical-store details. The site does not exhibit phishing, brand-impersonation, cryptocurrency, or other abuse indicators in the supplied analysis, supporting normal interaction, including account login and standard use.

- The homepage identifies BRANDSHOP as an online fashion retailer and displays branded merchandise, categories, and prices.
- The homepage and linked retail information provide customer-support, delivery, return, social-channel, and Moscow-store references.
- The domain was registered in 2005 and is approximately 21.26 years old.

### Regulatory Verification Notes

The site supplies legal and privacy references appropriate to a consumer retailer, while the supplied evidence does not establish a regulated-financial licensing claim. That is a limited disclosure point rather than an identity contradiction. Independent reputation checks were clean, and no adverse broker association was identified.

- The homepage references delivery, returns, legal, and privacy information.
- The site's hosting infrastructure is AS57724, DDOS-GUARD - DDOS-GUARD LTD, RU.
- The site uses a valid DV TLS certificate issued by YR1, expiring 2026-10-28.

### What to Verify Next

Before a material purchase, confirm the applicable delivery, return, and payment terms on the relevant site pages and use the published store or support details to resolve any transaction-specific question.

- Product and category pages provide the commercial basis for the proposed transaction.
- Delivery and return links identify the site's stated fulfillment and remediation process.
- Physical-store information provides an additional channel for ordinary retail verification.

### Summary Verdict

BRANDSHOP presents as a legitimate, established, and trustworthy ecommerce business with a coherent commercial purpose and no observed scam or impersonation contradictions. The overall posture supports normal browsing, account use, and standard transactions.

### Infrastructure Integrity

The site resolves directly to infrastructure operated by DDOS-GUARD rather than a trusted CDN, with two likely origin addresses identified. This architecture provides some network-level protection but should be treated as a mitigating control, not proof of legitimacy.

### Closing Assessment

Normal interaction is appropriate, with ordinary care applied to reviewing transaction terms and retaining purchase records.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

### What the analysis found

No rule findings contributed to this verdict.

### Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 55/100     |
| Identity verification confidence | 60%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about brandshop.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
