

Is brauhausschmitzoktoberfest.com legit? TrustSniffer's high-trust assessment: 75/100

brauhausschmitzoktoberfest.com

Verdict

75
OUT OF 100

HIGH TRUST

brauhausschmitzoktoberfest.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

The page is a very large, unstructured listing of phone numbers, IP-like strings, product codes and short keywords. It lacks explanatory text, branding, contact or monetization details. Appears to be a scraped data dump or directory; contains potentially sensitive personal contact data and low trustworthiness.

Evidence status and limitations

- Evidence completeness: **UNKNOWN**
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What brauhauschmitzoktoberfest.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a large, unstructured directory-style page containing phone numbers, IP-like strings, product codes, and short keywords, with no clearly presented commercial offering, explanatory business description, or visible interaction workflow; its apparent purpose is aggregated reference or data-dump content rather than a conventional consumer or financial service.

Scam/Impersonation Risk

No blacklist, phishing, malware, brand-impersonation, or conflicting-identity contradiction was observed. The homepage is nevertheless unusually opaque in function: it contains a very large volume of mixed identifiers and potentially personal contact data, while providing little context about sourcing, ownership, or intended use. That is a content-quality and privacy concern, but the available evidence does not establish a scam or impersonation operation. The domain's historical record also shows continuity across the observed period rather than a documented suspicious repurposing event.

EVIDENCE

- The homepage is classified as a “Data dump / Directory listing” and contains phone numbers, IP-like strings, product codes, and short keywords without explanatory business content.
- The homepage has no login form, sensitive form, hidden form, wallet-connect activity, or external password-submission destination.
- Historical records show 15 archive snapshots first seen on 2016-07-30 and last seen on 2026-08-10, covering 11 years tracked.
- The domain was registered in 2025 and is approximately 0.92 years old according to the registration record.

Regulatory Verification Notes

The site does not present a clear monetized service, financial product, or regulated activity on the observed homepage, so licensing applicability cannot be determined from the available content. It also provides insufficient business explanation for a prospective counterparty to establish what entity, service, or transaction would be subject to regulatory review. This is a verification and disclosure gap rather than evidence of fraud. Available external reputation context is benign: no matching broker record was identified, and the observed abuse-reputation result was whitelisted with no reported abuse.

EVIDENCE

- The homepage states no clear monetization model and contains no identified license authority or license number.
- The domain registrar is COSMOTOWN, INC.; the recorded creation date is 2025-09-19T17:26:16Z and the expiration date is 2026-09-19T17:26:16Z.
- The site is served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The TLS certificate uses WE1 as issuer, has DV validation, and is valid to 2026-10-11T10:25:51+00:00.

What to Verify Next

Before any credential or payment interaction, an independent counterparty should establish the responsible legal entity, confirm that the site's actual purpose is understood, and assess whether the displayed data has a lawful and appropriate source. If the service later presents regulated financial or data-handling functionality, the relevant licensing or registration should be checked directly with the applicable official registry rather than relying on the website's own statements. Contact channels should also be confirmed through an independent route, and payment protections should be retained for any transaction.

EVIDENCE

- The homepage has no explanatory service description, visible contact details, external links, or structured business metadata.
- The homepage contains potentially sensitive personal contact data and mixed technical identifiers.
- No sensitive submission workflow or externally posted credential form was observed during technical interaction testing.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture with no observed scam or impersonation contradictions. The classification should not be treated as independent proof of the real-world operator’s identity, particularly because the site’s purpose and accountable entity are not clearly established in its visible content.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with observed traffic resolving to Cloudflare edge servers rather than a directly exposed origin. This provides a meaningful mitigation against direct infrastructure exposure and abuse, but it is a protective hosting characteristic rather than proof of operator legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; credential or payment engagement should remain subject to ordinary independent checks of the counterparty, transaction protections, and the specific purpose of the service.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of brauhausschmitzoktoberfest.com.

- The request stayed on brauhausschmitzoktoberfest.com. It was not redirected to another domain. CLEAR
- Registration is published under COSMOTOWN, INC.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-19. NOTED
- The earliest public archive of this site is from 2016-07-30. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about brauhausschmitzoktoberfest.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
