

Is braunengineering.com legit? TrustSniffer's high-trust assessment: 100/100

braunengineering.com

Verdict

100

OUT OF 100

HIGH TRUST

braunengineering.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Braun Engineering srl - Italian supplier specialized in trading semi-finished non-ferrous metal products (copper, brass, aluminum, bronze, alpacca). Site functions as corporate/product catalog with contact request and information about materials and applications.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a corporate B2B supplier website presenting an industrial product catalogue and an information-request channel for prospective commercial customers, with an apparent business model based on selling semi-finished materials and responding to quotation or product enquiries.

Scam/Impersonation Risk

No contradictions were observed. The site's stated purpose, navigation, and content are consistent with a small industrial supplier rather than a credential-harvesting, investment, or impersonation operation. Its pages describe copper, brass, aluminium, bronze, and alpacca products in forms such as bars, strips, sheets, profiles, discs, and wire, with applications across plumbing, automotive, construction, electronics, and engineering; this is a coherent commercial proposition with no identified fraud indicators. The contact workflow requests information rather than passwords or payment credentials, and available external checks recorded no malicious or suspicious finding. The site's apparent legitimacy is therefore evidence-consistent, while the real-world operator remains independently unverified.

EVIDENCE

- The homepage describes Braun Engineering srl as a specialist in trading semi-finished non-ferrous metals and directs visitors to product and information-request pages.
- The product pages cover copper, brass, aluminium, and bronze materials; the stated applications and material formats are consistent with the corporate catalogue purpose.
- The contact page contains a single contact-request form, with no login form, hidden sensitive form, or untrusted submission destination identified.
- Domain registration: created 2001-01-18T18:29:43Z; age 25.6 years; expiry 2027-01-18T18:29:43Z.

Regulatory Verification Notes

The site presents itself as an industrial commercial supplier, not as a financial or other regulated service. The reviewed material includes About, Contact, Certifications, Privacy Policy, and product sections, but the available evidence does not independently verify the legal operator or the details and issuing authority of any certification. No licensing claim or license number is supplied for verification; for this business model, that is a transparency item rather than evidence of scam activity. Domain registration is through TUCOWS.COM, CO., and the technical service is operating with valid domain-validated transport encryption.

EVIDENCE

- The About, Contact, and Certifications sections provide the site's principal identity and commercial-disclosure surfaces; independent operator verification is not established by the reviewed evidence.
- The site navigation includes a Certifications page, but the supplied page evidence does not establish certification issuer, scope, or validity.
- Hosted on AS212238 (CDNEXT - Datacamp Limited, GB).
- TLS certificate issued by YR1 (DV), valid to 2026-09-08.

What to Verify Next

Before credential or payment interactions, independently confirm Braun Engineering's legal entity details through an authoritative business registry and validate any claimed certifications with the issuing bodies. For a quotation or purchase, confirm the contracting entity, delivery and return terms, invoicing details, and payment-protection arrangements through independently obtained contact channels rather than relying solely on information presented on the website.

EVIDENCE

- The homepage and About section identify the business as Braun Engineering srl.
- The Certifications section is available for document-level validation.
- The Contact section provides the stated route for information requests and commercial engagement.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-conflict signal was identified, although the operator's real-world identity is not independently verified.

Infrastructure Integrity

The site resolves to one observed address and is hosted by CDNEXT - Datacamp Limited, GB, on AS212238; no CDN or WAF was identified. The resolved infrastructure and valid TLS provide basic transport and hosting integrity, but they are mitigating technical signals rather than proof of operator identity.

Closing Assessment

Ordinary browsing and commercial enquiry are proportionate, while independent entity, certification, contractual, and payment-protection checks should precede credential submission or financial commitment.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of braunengineering.com.

- The request stayed on braunengineering.com. It was not redirected to another domain. CLEAR
- Registration is published under TUCOWS.COM, CO.. CLEAR
- DNS for this domain is served by technorail.com, across 4 name servers. NOTED
- The registration is paid up to 2027-01-18. NOTED
- The earliest public archive of this site is from 2004-04-15. CLEAR
- It is hosted on CDNEXT, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about braunengineering.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
