Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Bremer Chiropractic is a local healthcare website for a chiropractic clinic in Eastern Heights, Ipswich, Queensland. It presents chiropractic care, dry needling, shockwave therapy, paediatric and pregnancy services, practitioner information, contact details, and appointment booking, with an apparent business model based on in-person clinical treatments.

Scam/Impersonation Risk

No contradictions were observed. The site's content is consistent with a conventional local clinic rather than an investment, cryptocurrency, credential-harvesting, or impersonation operation. The homepage identifies the Bremer Chiropractic brand, location, services, and practitioners, while observed interaction testing found no login form, hidden sensitive form, wallet activity, cloaking, clipboard manipulation, or suspicious inline scripts. The available reputation checks also recorded no malicious or suspicious detections and no confirmed blacklist, phishing, or brand-impersonation signal. The real-world operator identity nevertheless remains independently unverified, so the apparent legitimacy should not be treated as proof of legal ownership.

EVIDENCE

- Domain registration continuity indicates approximately 14.55 years of existence, covering approximately 2011–2026.
- The site's historical record contains 153 snapshots spanning 2012–2026, with 15 years tracked.
- The homepage is classified as a local healthcare clinic and contains no listed red flags; observed behavior recorded no login form, hidden sensitive form, wallet activity, or cloaking.

Regulatory Verification Notes

The website presents a coherent clinic identity and identifies named practitioners, a Queensland location, contact channels, office information, and booking functionality. No healthcare licence, registration number, or licensing authority is claimed in the supplied site content, which is a verification gap rather than evidence of deception. The registration record names Synergy Wholesale Accreditations Pty Ltd as registrar and ADIO SUKOZU BREMER PTY LTD as the recorded owner; this technical record does not independently establish that the named entity operates the clinic. No matching third-party broker profile was found, and the available authority signal is contextual only.

EVIDENCE

- The homepage and service pages identify chiropractic care, dry needling, shockwave therapy, paediatric and pregnancy services, and DVA and Medicare services.
- The site's hosting resolves to AS16509, AMAZON-02 – Amazon.com, Inc., US.
- The site uses a valid domain-validated TLS certificate issued by YE1, valid to 2026-11-08.
- The registration record lists Synergy Wholesale Accreditations Pty Ltd as registrar.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the clinic's legal operating identity, practitioner standing with the relevant Australian healthcare or professional register, appointment and cancellation terms, and any conditions attached to DVA or Medicare claims. Contact details should also be confirmed through an independent offline or authoritative local-business source, and payment should use a method offering appropriate transaction protection.

EVIDENCE

- The site's About and team content provides the practitioner names that can be checked against the relevant professional register.
- The Contact and booking content provides the clinic information and appointment pathway needed for independent confirmation.
- The service and healthcare-coverage pages identify the claims and treatment categories requiring clarification before a paid appointment.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The site's business presentation, technical

operation, and historical continuity support normal consideration of its stated services, while the operator’s real-world identity remains unverified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure. The observed address belongs to the CDN edge layer, and no origin candidate was identified; this reduces direct origin exposure but is a mitigating security control, not proof of legitimacy.

Closing Assessment

Normal browsing and appointment consideration are proportionate, subject to the ordinary independent identity, practitioner-status, service-terms, and payment-protection checks expected before submitting credentials or making payment.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bremerchiropractic.com.au.

- The request stayed on bremerchiropractic.com.au. It was not redirected to another domain. CLEAR
- Registration is published under Synergy Wholesale Accreditations Pty Ltd. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The earliest public archive of this site is from 2012-01-30. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bremerchiropractic.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
