

Is brentwoodelectricalsolutions.com a scam? TrustSniffer's high-risk assessment: 0/100

brentwoodelectricalsolutions.com

Verdict

0

OUT OF 100

CRITICAL RISK

brentwoodelectricalsolutions.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

A basic WordPress site for 'Brentwood Electrical Solutions' showing default sample content and a blog. Appears to be a low-risk small business/blog presence with no signs of phishing or financial fraud.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Brentwood Electrical Solutions

Blog

What brentwoodelectricalsolutions.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This is a basic WordPress website presenting “Brentwood Electrical Solutions” as a local electrical-services business with informational pages, a blog, and a shop section; the visitor-facing content is largely default sample material rather than a developed commercial presence.

Scam/Impersonation Risk

Confirmed external threat detections and a blacklist hit create a critical risk posture for sensitive interaction, despite the site's benign-looking presentation. The homepage contains no login form, credential-harvesting mechanism, suspicious scripts, or explicit phishing content, and the site does not appear to impersonate a detected brand. That favorable page-level evidence does not offset the independent malicious detections associated with the domain. No identity contradiction was observed, but the apparent local-business presentation should not be treated as sufficient evidence of a safe or verified operator.

EVIDENCE

- External reputation assessment recorded 14 malicious detections, including flags from Kaspersky and Sophos.
- The domain is recorded as blacklisted by external reputation sources.
- The homepage contains 334 characters of visible text, no sensitive forms, no login form, and no hidden forms.
- Browser testing recorded 0 external XHR/fetch requests, 0 suspicious inline scripts, 0 wallet-provider runs, and 0 clipboard-write events.

Regulatory Verification Notes

The site presents ordinary electrical services, blog content, and a shop rather than financial or investment products. However, its legal and regulatory disclosure remains unclear: no licensing authority or license number is claimed in the supplied site content, and the real-world operator identity is not independently verified. This is a verification gap rather than a standalone finding of fraud. The domain registration record identifies 1API GmbH as registrar and records a registrant entry associated with “brentwoodelectricalsolutions.com OWNER”; these technical registration details do not establish that the named business is legally authorized to provide electrical services.

EVIDENCE

- Registration record: created 2023-12-29 and approximately 2.64 years old; registrar 1API GmbH.
- Historical archive records: 2 snapshots spanning 2025–2026, with records dated 2025-07-10 and 2026-03-08.
- Hosting telemetry: served from AS399250, NAMEHERO-KCDC – Name Hero, LLC, US.
- Transport encryption: TLS certificate issued by YR2 at DV validation level, valid through 2026-10-08.

What to Verify Next

Before any service booking, purchase, or exchange of personal information, an independent registry check should confirm the operator’s legal identity and the applicable authorization for electrical work. Any commercial engagement should also use an independently sourced business telephone number or address and payment arrangements that provide documented invoices, cancellation terms, and dispute protection. Credentials, payment details, and sensitive documents should not be submitted until those checks resolve the external reputation concern.

EVIDENCE

- Independent registry check: match the business name and service authorization against the relevant jurisdictional records.
- Independent contact check: obtain contact details from a separately sourced business listing rather than relying solely on the website.
- Transaction check: require written pricing, scope, refund or cancellation terms, and a protected payment method before payment.

Summary Verdict

The overall posture is critical, with the domain unsuitable for trust-sensitive interaction on the available evidence. The site’s simple informational appearance and lack of observed credential-harvesting behavior do not overcome the confirmed external reputation contradictions. The claimed business identity remains apparent rather than independently established.

Infrastructure Integrity

The site resolves directly to a hosting origin, with no CDN or WAF vendor detected. This provides no evident edge-layer mitigation, so the infrastructure should be regarded as ordinary web hosting rather than as an independent legitimacy signal.

EVIDENCE

- Infrastructure resolution recorded 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- CDN detection: no CDN present; no trusted CDN identified.

Closing Assessment

Prospective users should restrict activity to non-sensitive observation unless independent business and authorization checks produce satisfactory results; credentials, payment details, and sensitive documents should not be submitted in the meantime.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of brentwoodelectricalsolutions.com.

- The request stayed on brentwoodelectricalsolutions.com. It was not redirected to another domain. CLEAR
- Registration is published under 1API GmbH. CLEAR
- DNS for this domain is served by namehero.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-29. NOTED
- The earliest public archive of this site is from 2025-07-10. CLEAR
- It is hosted on NAMEHERO-KCDC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about brentwoodelectricalsolutions.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
