

Is brigadeled.com safe? TrustSniffer's low-trust assessment: 25/100

brigadeled.com

Verdict

25

OUT OF 100

LOW TRUST

brigadeled.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Brigade LED corporate site describing LED video wall product lines (outdoor/indoor/rental), company history, offices in Indian cities, project case studies, testimonials, and contact/lead capture forms (newsletter and contact sales).

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What brigadeled.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Brigade LED is a corporate product website presenting LED video wall solutions for outdoor, indoor, and rental applications, together with installation, content-management software, technical support, project examples, testimonials, and sales-contact forms. Its apparent business model is the sale and integration of commercial display systems and related services.

Scam/Impersonation Risk

The site presents a coherent corporate/product profile and the page-level review found no login form, credential-harvesting mechanism, hidden form, wallet connection, or financial solicitation. However, these benign content characteristics are outweighed by a material external reputation contradiction: the domain is **blacklisted**, and multiple external detections classify it as malicious or suspicious. No separate identity inconsistency or explicit brand-impersonation indicator was identified in the supplied page content, but the blacklist status is sufficient to support a high-risk posture for sensitive interaction.

EVIDENCE

- The homepage and product pages describe LED video wall manufacturing and integration rather than financial, cryptocurrency, or investment services.
- The contact page contains a contact form and newsletter form; technical inspection found no password form, hidden form, or external password submission.
- Domain registration records show creation on 2018-11-11 and an age of 7.78 years; the registrar is HOSTINGER operations, UAB.
- External reputation results record 4 malicious and 1 suspicious detections, together with blacklist status from two sources.

Regulatory Verification Notes

The About Us, Certifications, Our Team, and Contact Us pages provide business context, company history, office-location claims, certifications, testimonials, and sales channels. These materials support an apparent commercial identity, but they do not independently verify the operating legal entity. No license or registration number is claimed or verified in the supplied evidence, leaving a regulatory-disclosure gap that is separate from the external reputation issue. A third-party broker-data check produced no match; that is contextual only and is not evidence of licensing or regulatory approval.

EVIDENCE

- The About Us and Our Team pages present company-history and personnel information, while the Contact Us page identifies offices in Indian cities.
- The Certifications and project-case-study content provides commercial substantiation but does not establish regulatory authorization.
- No license authority or license number is identified in the supplied business-model assessment.
- The site's TLS certificate is issued by YE2 at DV validation level and is valid until 2026-11-09.

What to Verify Next

Before any sensitive interaction, an institution should independently confirm the company's legal name, physical presence, and authority to sell and install the advertised equipment through an offline channel or an independently sourced business registry. Any applicable tax, import, electrical-safety, or product-certification claims should be checked against the relevant Indian authority or certification body rather than relying solely on the site. Official support and sales channels should also be confirmed through independently obtained contact details, and payment arrangements should use buyer-protected methods with documented delivery and warranty terms.

EVIDENCE

- The site provides About Us, Certifications, Our Team, Contact Us, and project pages that can be cross-checked against independent records.
- The business model is described as product sales, installation, content-management software, and technical support, creating identifiable commercial claims for verification.
- The supplied evidence contains no verified regulatory authority or registration number.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. Although the website content appears coherent and commercially plausible, the authoritative assessment is driven by confirmed external reputation contradictions that materially undermine confidence in proceeding with credentials, payments, or other consequential activity.

Infrastructure Integrity

The site resolves directly to infrastructure associated with Hostinger International Limited in Cyprus, with four likely origin addresses and no detected CDN or edge-IP layer; no WAF vendor was identified. Transport encryption is present, but the certificate uses domain validation only, and standard hosting plus TLS should be treated as basic technical controls rather than proof of legitimacy.

Closing Assessment

Pending independent resolution of the reputation contradiction and confirmation of the operating business, activity should remain limited to passive review; credentials, payment details, and other sensitive information should not be submitted.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [brigadeled.com](#).

- The request stayed on [brigadeled.com](#). It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by [dns-parking.com](#), across 2 name servers. NOTED
- The registration is paid up to 2026-11-11. NOTED
- The earliest public archive of this site is from 2021-02-20. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [brigadeled.com](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
