- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Bring Me The News is an established regional digital news publisher presenting current Minnesota and Wisconsin reporting across news, weather, public safety, business, sports, and lifestyle topics, supported by advertising, sponsored promotions, and newsletter-based audience engagement.

Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, or other scam indicators were observed. The long-lived publishing footprint, extensive historical record, established global readership, clean external reputation, named editorial contributors, and absence of sensitive or concealed forms collectively support the site's legitimacy. Interactive testing also found no cloaking, wallet-related behavior, clipboard manipulation, or suspicious outbound submissions.

- The homepage presents extensive current regional reporting with named authors and recognizable editorial categories.
- Registered in 2009 (~17 years old) through GoDaddy.com, LLC; the registration is valid to 2027-03-21.
- The web archive contains 5,000 snapshots spanning 2001–2021 (21 years tracked), with no substantiated suspicious repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no reported abuse, and a global traffic rank of 35,931.

Regulatory Verification Notes

The site operates as a news and media publisher rather than as a financial, investment, or regulated brokerage service. Its observed content does not solicit investments, offer financial products, or claim a regulated license; consequently, the absence of licensing information is not adverse in this business context. Standard publisher information and policy links are present, while private domain registration through Domains By Proxy is a routine administrative arrangement and does not detract from the consistent public-facing identity.

- The homepage identifies the service as regional news media and contains no investment solicitation or sensitive financial-information request.
- Publisher information, contact links, and standard policies are available through the homepage navigation.
- The hosting endpoint is served from AS54113 (Fastly, Inc., US).
- The site's transport encryption uses a GlobalSign Atlas R3 DV TLS CA 2026 Q2 certificate (DV), valid to 2026-12-20.

What to Verify Next

Institutional users may confirm that editorial communications originate through channels published on the site and review the applicable policy terms before entering advertising, syndication, sponsorship, or other commercial arrangements. Sponsored material should also be assessed under the institution’s normal media-source and disclosure standards.

- The homepage promotes newsletter-based engagement but displayed no sensitive form or untrusted submission destination during analysis.
- Commercially oriented homepage content includes sponsored promotions alongside conventional editorial reporting.
- Browser testing completed two successful interaction runs without hidden forms, external form posts, cloaking, or suspicious inline scripts.

Summary Verdict

The website is legitimate, established, and trustworthy. Its coherent publisher identity, durable operating history, substantive editorial output, meaningful readership, and clean security reputation converge on a high-confidence assessment suitable for normal interaction, including account login and standard use.

Infrastructure Integrity

The website uses Fastly’s CDN/WAF infrastructure, with all four observed addresses belonging to Fastly edge services; this reduces direct exposure of the origin system and provides a mainstream protective delivery layer. Such protection is a mitigating security control rather than independent proof of legitimacy.

Closing Assessment

Prospective users may engage with the site normally, applying ordinary organizational controls to subscriptions and any separate commercial relationship.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bringmethenews.com.

- The request stayed on bringmethenews.com. It was not redirected to another domain. CLEAR

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bringmethenews.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
