

Is **broadwayelectric.com** legit? TrustSniffer's high-trust assessment: **100/100**

broadwayelectric.com

Verdict

100

OUT OF 100

HIGH TRUST

broadwayelectric.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Broadway Electric Inc. corporate site providing company information, services (electrical, construction, communications, engineering), recent projects, contact details, and career/community information. Site uses cookie consent and Google Analytics.

Evidence status and limitations

- Evidence completeness:

UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What broadwayelectric.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Broadway Electric Inc.'s website is an informational corporate site for a regional electrical construction and engineering contractor, presenting its electrical, construction, communications, and engineering services, project work, company information, careers, safety, community activities, and contact channels to prospective commercial, industrial, and public-sector customers.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent corporate profile rather than a deceptive or abuse-oriented interaction model: its homepage and service pages describe conventional contracting activities, while its projects section provides named work such as the Clarence Buckingham Memorial Fountain renovation, O'Hare International Airport emergency power systems, and the Chicago Theatre fire-alarm upgrade. Technical behavior also showed no login form, hidden form, wallet interaction, clipboard activity, cloaking, or suspicious external submissions. The available evidence is therefore consistent with an established, apparently legitimate website, although the real-world operator identity has not been independently verified.

EVIDENCE

- The domain was registered on 1998-07-26 and is approximately 28.09 years old, based on registration records.
- The homepage and projects pages present a conventional corporate-services profile with named project case studies and no detected impersonation indicators.
- Behavioral testing recorded 0 external XHR/fetch requests, 0 wallet-connect runs, 0 hidden forms, and 0 suspicious inline scripts.

Regulatory Verification Notes

The About, Services, Careers, and Contact pages provide substantive corporate and operational content, including an “Employee Owned Company” statement, service descriptions, project information, a telephone number, and a Mount Prospect, Illinois office address. This supports an evidence-consistent corporate identity, but it does not independently prove the legal operator. The reviewed content does not present a licensing authority or license number; for an electrical and construction contractor, the applicable licensing and permit position should therefore be confirmed independently where relevant. No negative third-party broker-reputation match or malicious reputation finding was recorded.

EVIDENCE

- The site's corporate pages identify the business as Broadway Electric Inc. and describe electrical, construction, communications, and engineering operations.
- The service and project pages contain substantive business descriptions rather than investment, financial-return, or credential-harvesting claims.
- The site's transport encryption uses a TLS certificate issued by YR1 with DV validation, valid through 2026-09-24.

What to Verify Next

Before a commercial engagement, independently confirm the company's legal identity and any applicable state or local contractor licensing or permit requirements through the relevant official registry. For credential or payment interactions, confirm the intended contact route through an independently sourced business record and review the applicable contract, invoicing, refund, and payment-protection terms before proceeding.

EVIDENCE

- The reviewed site includes About, Services, Projects, Contact Us, Privacy Policy, and Careers pages that can be compared against independently sourced business records.
- The site uses a cookie-consent mechanism and Google Analytics, with one detected form limited to cookie consent rather than sensitive data collection.

Summary Verdict

The overall posture is high trust and low risk, with strong convergence across the site's substantive corporate content, long operating history, stable technical behavior, and clean available reputation signals. The website appears established and legitimate on the evidence reviewed, while independent operator verification remains appropriately separate from the trust assessment.

Infrastructure Integrity

The site is hosted on Google Cloud infrastructure in the United States, with a directly resolved hosting address and no CDN detected. This is conventional hosting rather than a standalone legitimacy proof, but the identified provider, stable resolution, and valid transport encryption provide a sound technical baseline and no observed infrastructure-based abuse signal.

EVIDENCE

- Hosted on AS15169 (Google LLC); resolved IP address 35.208.184.113; hosting country US.
- Infrastructure facts record Google Cloud as the hosting provider, ARIN as the registry, 1 unique IP, and 1 likely origin IP.
- Transport encryption is provided through a valid DV TLS certificate issued by YR1, expiring 2026-09-24.

Closing Assessment

The site is suitable for ordinary informational and prospective business engagement, subject to routine independent confirmation of the contracting entity, applicable licensing, and payment protections before credentials or funds are exchanged.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [broadwayelectric.com](#).

- The request stayed on [broadwayelectric.com](#). It was not redirected to another domain. CLEAR
- Registration is published under [GoDaddy.com, LLC](#). CLEAR
- DNS for this domain is served by [domaincontrol.com](#), across 2 name servers. NOTED
- The registration is paid up to 2028-07-25. CLEAR
- The earliest public archive of this site is from 2001-02-01. CLEAR
- It is hosted on [GOOGLE](#), from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about broadwayelectric.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
