

Is [broadwaygalleries.net](#) safe? TrustSniffer's low-trust assessment: 40/100

[broadwaygalleries.net](#)

Verdict

40

OUT OF 100

LOW TRUST

[broadwaygalleries.net](#) is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 75%.

What this site appears to be

Broadway Gallery — an established (since 1978) local gallery offering custom framing, art services (restoration, appraisal, installation), commissioned artwork and consultations. The site functions as an informational and service-promotional presence for a physical business.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

BROADWAYGALLERY

CUSTOM FRAMING & FINE ART SINCE 1978

What broadwaygalleries.net served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website presents Broadway Gallery as a local, established art gallery and custom picture-framing business, offering fine art, framing, restoration, appraisal, installation, consultation, commissioned artwork, printing, events, and related services to visitors seeking artistic products or professional art services.

Scam/Impersonation Risk

The site's homepage content is consistent with a conventional local gallery and does not contain observed login forms, wallet-connect functions, sensitive submission forms, or explicit brand-impersonation indicators. However, this benign presentation is outweighed by a confirmed blacklist finding corroborated by external malicious detections, creating a material risk for sensitive interactions. Runtime inspection also identified suspicious inline scripts and non-whitelisted outbound posts; these signals do not establish the site's specific compromise mechanism, but they reinforce the need for a security-forward posture. No conflicting legal-entity names, direct impersonation finding, or phishing form was observed. The domain's long registration and historical continuity are positive provenance signals, but they do not neutralize the current reputation contradiction.

EVIDENCE

- The homepage presents Broadway Gallery as a gallery and framing business with a stated heritage “since 1978,” alongside custom framing, fine-art, restoration, appraisal, installation, and consultation services.
- External reputation telemetry recorded 2 malicious detections and 1 suspicious detection, with the domain also identified on an external blacklist.
- Browser execution observed 2 suspicious inline scripts and 2 non-whitelisted external POST requests across 2 successful runs; no hidden forms or password-submission forms were detected.
- Domain registration telemetry records creation on 2001-04-20 and an age of 25.35 years; archive coverage records 268 snapshots spanning 2001–2026 across 26 tracked years.

Regulatory Verification Notes

The apparent business model is ordinary commercial gallery and art-service activity rather than a financial or regulated-services offering. The pages reviewed do not independently establish the legal operator, and no licensing or registration status is verified by the available evidence; this is a transparency point for independent confirmation, not by itself evidence of a scam. The site’s content quality and established historical footprint support the plausibility of a longstanding business, while the external security contradiction prevents those signals from supporting a positive interaction decision. The available third-party broker context produced no matched result and should not be treated as a licensing determination.

EVIDENCE

- The site’s navigation includes About, Contact, Employment Opportunity, Artist Submission, Terms-related business content, and service pages, but the reviewed evidence does not independently verify a legal entity or applicable registration.
- Hosting telemetry identifies AS209242 operated by CLOUDFLARESPECTRUM – Cloudflare London, LLC, US.
- The site’s transport encryption uses a DV certificate issued by WE1, valid through 2026-09-23.
- The registration record identifies GoDaddy.com, LLC as registrar, with creation on 2001-04-20 and expiration on 2031-04-20.

What to Verify Next

Before any transaction, prospective engagement should independently confirm that the physical gallery, trading name, and responsible legal entity correspond to one another through an offline or independently sourced channel. Any licensing, appraisal, restoration, or other professional requirement applicable to the relevant jurisdiction should be checked with the appropriate official registry. Payment arrangements should use established buyer-protection mechanisms, and contact details should be validated from an independent source rather than relying solely on the website.

EVIDENCE

- The homepage and About content provide the business presentation and claimed heritage that should be matched against independently sourced business information.
- The Contact and service pages are the appropriate locations for confirming the stated service channels and scope of engagement.
- The appraisal, restoration, installation, and commissioned-artwork offerings should be checked against any applicable local professional or commercial requirements.
- The checkout or payment process, if used, should be assessed for a recognized payment intermediary and transaction protections before funds are committed.

Summary Verdict

The website has a credible local-business presentation and substantial historical continuity, but its overall posture is **low trust** because confirmed external threat detections create a material contradiction. The available evidence supports browsing for general information only and does not support treating the site as suitable for sensitive interaction, credential submission, or financial activity.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and the observed address is a CDN edge address rather than an independently observable origin. This reduces direct exposure of the hosting environment and is a mitigating control, but protective delivery infrastructure cannot establish the legitimacy or safety of the underlying website.

EVIDENCE

- Observed edge address: 160.153.0.56.
- CDN/WAF provider: Cloudflare London, LLC, US; edge network AS209242.
- Infrastructure telemetry reports 1 unique IP, 1 edge IP, and 0 likely origin candidates.

Closing Assessment

The appropriate near-term posture is read-only browsing while independent business and contact verification is completed; credentials, account creation, and financial transactions should not be initiated in the interim.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page sent data to a destination TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

- The page carried inline scripts written in a style TrustSniffer treats as suspicious.

Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [broadwaygalleries.net](#).

- The request stayed on [broadwaygalleries.net](#). It was not redirected to another domain. [CLEAR](#)
- Registration is published under [GoDaddy.com, LLC](#). [CLEAR](#)
- DNS for this domain is served by [domaincontrol.com](#), across 2 name servers. [NOTED](#)
- The registration is paid up to 2031-04-20. [CLEAR](#)
- The earliest public archive of this site is from 2001-06-09. [CLEAR](#)
- It is hosted on [CLOUDFLARESPECTRUM](#), from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about broadwaygalleries.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
