

Is brokerapp.com.br legit? TrustSniffer's high-trust assessment: 100/100

brokerapp.com.br

Verdict

100

OUT OF 100

HIGH TRUST

brokerapp.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 70%.

What this site appears to be

Portuguese-language landing page for BrokerApp, a subscription platform serving RE/MAX real-estate agencies and brokers. It promotes property-pricing studies, follow-up reports, lead management, email marketing, marketing assets, CRM integrations, and two clearly priced monthly plans, with contact/demo forms and a 60-day trial.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Portuguese-language real-estate software platform for RE/MAX agencies and brokers, offering property-pricing studies, client follow-up reports, lead management and distribution, email marketing, marketing materials, CRM integration, and optional usage credits through monthly plans priced at R\$399 and R\$599 following a 60-day trial.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or malicious reputation indicators were observed. The domain has a multi-year operating history, substantial archival continuity, and an established traffic footprint. Interactive testing found no cloaking, hidden forms, credential forwarding, or untrusted form destinations; this convergence supports the conclusion that the site is an established service rather than an imitation or credential-harvesting operation.

- Domain-registration records identify Geraldo da Cruz Carpes as the owner and show registration in 2020 (~6.24 years old), with expiry in 2030.
- The web archive contains 193 snapshots spanning September 2021–May 2026 (6 years tracked), with no confirmed suspicious repurposing or semantic drift.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, no abuse reports, and a traffic rank of 727,402.
- The homepage's contact and demonstration forms request no sensitive data, use no untrusted destination, and exhibit no hidden-form or phishing behavior.

Regulatory Verification Notes

BrokerApp presents itself as commercial SaaS rather than a financial, investment, or brokerage service requiring the financial-market licensing scrutiny applicable to regulated intermediaries. The homepage reportedly provides a CNPJ, privacy controls, defined subscription terms, and support channels, which are constructive business-transparency signals. Its description as exclusive to the RE/MAX network is a commercial affiliation claim; the supplied evidence does not independently authenticate that relationship, but there is no conflicting legal identity or adverse broker-intelligence match.

- The homepage describes the service as real-estate management and marketing software and discloses a CNPJ.
- The homepage includes privacy controls through a cookie-consent mechanism and provides Facebook, Instagram, and WhatsApp channels.

- The site is served from AS47583 (Hostinger International Limited), with infrastructure located in Germany.
- The site’s transport encryption uses a DV certificate issued by GlobalSign GCC R6 AlphaSSL CA 2025, valid to 2026-12-05.

What to Verify Next

Institutional onboarding should confirm the displayed corporate identifier against the applicable Brazilian business registry, obtain independent confirmation of the claimed RE/MAX relationship, and review the subscription agreement, privacy terms, data-processing provisions, cancellation conditions, and credit-purchase mechanics. Official contact channels should also be confirmed through an independently sourced corporate route before procurement or systems integration.

- The homepage’s corporate identifier provides the basis for an independent registry comparison.
- The homepage’s network-exclusivity statement provides a specific affiliation claim for confirmation with the named organization.
- The platform’s contact and demonstration workflows indicate that prospective customers may submit business information during onboarding.
- The advertised CRM, lead-distribution, messaging, and portal integrations make contractual review of access controls, retention, and downstream data sharing relevant.

Summary Verdict

BrokerApp is a legitimate, established, and trustworthy real-estate SaaS website. Its consistent business presentation, durable provenance, clean external reputation, and benign observed behavior support normal interaction, including account login and standard platform use.

Infrastructure Integrity

The site is directly hosted without a detected CDN or WAF layer, and the single resolved address is a likely origin server. This is a conventional hosting arrangement rather than an adverse signal, although it provides less origin shielding than an edge-proxied architecture; the valid encrypted transport materially protects browser-to-site communications.

Closing Assessment

Prospective customers may proceed with ordinary evaluation, account access, and standard use, applying routine vendor-onboarding and contractual due diligence appropriate to a business SaaS provider.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of brokerapp.com.br.

- The request stayed on brokerapp.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns.br, across 2 name servers. NOTED
- The registration is paid up to 2030-05-06. CLEAR
- The earliest public archive of this site is from 2021-09-28. CLEAR
- It is hosted on AS-HOSTINGER, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about brokerapp.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
