

Is btck.co.uk legit? TrustSniffer's high-trust assessment: 75/100

btck.co.uk

Verdict

75

OUT OF 100

HIGH TRUST

btck.co.uk appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

A standard Cloudflare security block page states that access to btck.co.uk was denied and provides troubleshooting instructions and a Ray ID. The underlying website content is unavailable, so its purpose and business model cannot be reliably assessed.

Evidence status and limitations

Evidence completeness: UNKNOWN

- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website currently presents visitors with a Cloudflare security challenge rather than its underlying content; consequently, its products, services, and business model are not visible in the captured page, while its apparent operational purpose remains that of an established web property protected against automated or potentially harmful requests.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, malicious forms, cloaking, or other confirmed scam signals were observed. External reputation checks were clean, and the domain has an extensive archival footprint spanning more than a decade, with no established evidence of suspicious repurposing or a change between conflicting business identities. The accessible security page contained no login form, wallet interaction, hidden form, or untrusted submission destination.

- The homepage capture displayed a standard access-block notice and did not solicit credentials, payments, wallet access, or other sensitive information.
- Behavioral examination of the captured page found no hidden forms, suspicious scripts, clipboard manipulation, wallet-provider interaction, or cloaking.
- External reputation telemetry recorded no malicious or suspicious detections, no reported infrastructure abuse, and no external threat-list match.
- Domain provenance extends approximately 16.08 years; 1,374 archive snapshots span 2010-07-01 to 2026-04-16, covering 17 tracked years without confirmed suspicious repurposing.

Regulatory Verification Notes

The captured homepage did not expose the underlying site's legal, corporate, or regulatory disclosures, so no licensing claim, registration number, or regulated activity could be assessed from the available page. This is a limited disclosure observation arising from the security challenge, not evidence of unlawful activity or misrepresentation. No matching broker profile was identified in the supplied third-party context, but that absence is not a licensing determination.

- The homepage security challenge contained no company identity, terms, regulatory statement, licence claim, or business description.
- Registration telemetry names KAJI Media Limited trading as IGB Media as registrar, with the current registration dated 2025-06-27 and expiry dated 2027-06-27.

- The site is served from AS13335 (Cloudflare); its transport certificate was issued by WE1 with DV validation and is valid until 2026-09-26.
- The captured page exposed no financial, brokerage, cryptocurrency, or other regulated product offering.

What to Verify Next

For institutional onboarding or contractual engagement, the underlying site should be accessed through an ordinary supported browser session so that its legal notice, terms, privacy policy, operating entity, and service description can be reviewed. If the recovered content presents regulated services, any stated authorisation should then be confirmed directly with the named regulator, and official contact channels should be corroborated through an independent corporate source.

- The homepage instructed blocked visitors to enable cookies and contact the site owner with the displayed request identifier when seeking access restoration.
- The captured response provided no internal navigation or external links through which corporate or contractual documentation could be examined.
- Two completed behavioral runs returned stable responses without detecting a sensitive interaction surface.

Summary Verdict

The site is assessed as a legitimate, established, and trustworthy web property. Its long historical footprint, clean threat reputation, stable observed behavior, and absence of contradictory identity or abuse signals provide convergent support for normal interaction, including account login and standard use.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF layer, with all five observed addresses identified as edge infrastructure and no direct origin candidate exposed. This reduces direct server exposure and supports operational resilience, although protective infrastructure is a security control rather than independent proof of legitimacy.

Closing Assessment

Prospective users may proceed with normal use, while organizations contemplating a formal or regulated relationship should complete their standard counterparty due-diligence process.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of btck.co.uk.

- The request stayed on btck.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under KAJI Media Limited t/a IGB Media [Tag = KAJIMEDIA]. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-27. NOTED
- The earliest public archive of this site is from 2010-07-01. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about btck.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
